

四级·真题卷第3套·2021年6月

Part I Writing (30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay titled "Do violent video games lead to violence?". The statement given below is for your reference. You should write at least 120 words but no more than 180 words.

A growing body of research finds that violent video games can make kids act aggressively in their real world relationships, causing an increase in violence.

Part II Listening Comprehension (25 minutes)

Section C

本部分与 2021年6月第1套 共用，[点此查看](#)

Part III Reading Comprehension (40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Nowadays you can't buy anything without being asked to provide a rating of a company's performance on a five-star scale.

I've been asked to rate my "store 26 " on the EFTPOS terminal before I can pay. Even the most 27 activities, such as calling Telstra or picking up a parcel from Australia Post, are followed by texts or emails with surveys asking, "How did we do?"

Online purchases are 28 followed up by a customer satisfaction survey. Companies are so 29 for a hit of stars that if you delete the survey the company sends you another one.

We're 30 to rate our apps when we've barely had a chance to use them. One online course provider I use asks you what you think of the course after you've only completed 31 2 per cent of it.

Economist Jason Murphy says that companies use customer satisfaction ratings because a 32 display of star feedback has become the nuclear power source of the modern economy.

However, you can't help but 33 if these companies are basing their business on fabrications(捏造的东西). I 34 that with online surveys I just click the 35 that's closest to my mouse cursor(光标) to get the damn thing off my screen. Often the star rating I give has far more to do with the kind of day I'm having than the purchase I just made.

- | | |
|----------------|--------------|
| A) announce | I) roughly |
| B) commonplace | J) routinely |
| C) confess | K) shining |
| D) desperate | L) showering |
| E) experience | M) variety |
| F) fascinated | N) voyage |
| G) option | O) wonder |
| H) prompted | |

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on **Answer Sheet 2**.

Science of setbacks: How failure can improve career prospects

- A) How do early career setbacks affect our long-term success? Failures can help us learn and overcome our fears. But disasters can still wound us. They can screw us up and set us back. Wouldn't it be nice if there was genuine, scientifically documented truth to the expression "what doesn't kill you makes you stronger"?
- B) One way social scientists have probed the effects of career setbacks is to look at scientists of very similar qualifications. These scientists, for reasons that are mostly arbitrary, either just missed getting a research grant or just barely made it. In social sciences, this is known as examining "near misses" and "narrow wins" in areas where merit is subjective. That allows researchers to measure only the effects of being chosen or not. Studies in this area have found conflicting results. In the competitive game of biomedical science, research has been done on scientists who narrowly lost or won grant money. It suggests that narrow winners become even bigger winners down the line. In other words, the rich get richer.
- C) A 2018 study published in the Proceedings of the National Academy of Sciences, for example, followed researchers in the Netherlands. Researchers concluded that those who just barely qualified for a grant were able to get twice as much money within the next eight years as those who just missed out. And the narrow winners were 50 percent more likely to be given a professorship.
- D) Others in the US have found similar effects with National Institutes of Health early-career fellowships launching narrow winners far ahead of close losers. The phenomenon is often referred to as the Matthew effect, inspired by the Bible's wisdom that to those who have, more will be given. There's a good explanation for the phenomenon in the book *The Formula: The Universal Laws of Success* by Albert Laszlo Barabasi. According to Barabasi, it's easier and less risky for those in positions of power to choose to hand awards and funding to those who've already been so recognized.

- E) This is bad news for the losers. Small early career setbacks seem to have a disproportionate effect down the line. What didn't kill them made them weaker. But other studies using the same technique have shown there's sometimes no penalty to a near miss. Students who just miss getting into top high schools or universities do just as well later in life as those who just manage to get accepted. In this case, what didn't kill them simply didn't matter. So is there any evidence that setbacks might actually improve our career prospects? There is now.
- F) In a study published in Nature Communications, Northwestern University sociologist Dashun Wang tracked more than 1,100 scientists who were on the border between getting a grant and missing out between 1990 and 2005. He followed various measures of performance over the next decade. These included how many papers they authored and how influential those papers were, as measured by the number of subsequent citations. As expected, there was a much higher rate of attrition(减员) among scientists who didn't get grants. But among those who stayed on, the close losers performed even better than the narrow winners. To make sure this wasn't by chance, Wang conducted additional tests using different performance measures. He examined how many times people were first authors on influential studies, and the like.
- G) One straightforward reason close losers might outperform narrow winners is that the two groups have comparable ability. In Wang's study, he selected the most determined, passionate scientists from the loser group and culled(剔除) what he deemed the weakest members of the winner group. Yet the persevering losers still came out on top. He thinks that being a close loser might give people a psychological boost, or the proverbial kick in the pants.
- H) Utrecht University sociologist Arnout van de Rijt was the lead author on the 2018 paper showing the rich get richer. He said the new finding is apparently reasonable and worth some attention. His own work showed that although the narrow winners did get much more money in the near future, the actual performance of the close losers was just as good.
- I) He said the people who should be paying regard to the Wang paper are the funding agents who distribute government grant money. After all, by continuing to pile riches on the narrow winners, the taxpayers are not getting the maximum bang for their buck if the close losers are performing just as well or even better. There's a huge amount of time and effort that goes into the process of selecting who gets grants, he said, and the latest research shows that the scientific establishment is not very good at distributing money. "Maybe we should spend less money trying to figure out who is better than who," he said, suggesting that some more equal dividing up of money might be more productive and more efficient. Van de Rijt said he's not convinced that losing out gives people a psychological boost. It may yet be a selection effect. Even though Wang tried to account for this by culling the weakest winners, it's impossible to know which of the winners would have quit had they found themselves on the losing side.
- J) For his part, Wang said that in his own experience, losing did light a motivating fire. He recalled a recent paper he submitted to a journal, which accepted it only to request extensive editing, and then reversed course and rejected it. He submitted the unedited version to a more respected journal and got accepted.
- K) In sports and many areas of life, we think of failures as evidence of something we could have done better. We regard these disappointments as a fate we could have avoided with more careful preparation, different training, a better strategy, or more focus. And there it makes sense that failures show us the road to success. These papers deal with a kind of failure people have little control over—rejection. Others determine who wins and who loses. But at the very least, the research is starting to show that early setbacks don't have to be fatal. They might even make us better at our jobs. Getting paid like a winner, though? That's a different matter.

36. Being a close loser could greatly motivate one to persevere in their research.
37. Grant awarders tend to favor researchers already recognized in their respective fields.
38. Suffering early setbacks might help people improve their job performance.
39. Research by social scientists on the effects of career setbacks has produced contradictory findings.
40. It is not in the best interest of taxpayers to keep giving money to narrow winners.
41. Scientists who persisted in research without receiving a grant made greater achievements than those who got one with luck, as suggested in one study.
42. A research paper rejected by one journal may get accepted by another.
43. According to one recent study, narrow winners of research grants had better chances to be promoted to professors.
44. One researcher suggests it might be more fruitful to distribute grants on a relatively equal basis.
45. Minor setbacks in their early career may have a strong negative effect on the career of close losers.

Section C

Directions: *There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.*

Passage One

Questions 46 to 50 are based on the following passage.

Boredom has become trendy. Studies point to how boredom is good for creativity and innovation, as well as mental health. It is found that people are more creative following the completion of a tedious task. When people are bored, they have an increase in "associative thought"—the process of making new connections between ideas, which is linked to innovative thinking. These studies are impressive, but in reality, the benefits of boredom may be related to having time to clear your mind, be quiet, or daydream.

In our stimulation-rich world, it seems unrealistic that boredom could occur at all. Yet, there are valid reasons boredom may feel so painful. As it turns out, boredom might signal the fact that you have a need that isn't being met.

Our always-on world of social media may result in more connections, but they are superficial and can get in the way of building a real sense of belonging. Feeling bored may signal the desire for a greater sense of community and the feeling that you fit in with others around you. So take the step of joining an organization to build face-to-face relationships. You'll find depth that you won't get from your screen no matter how many likes you get on your post.

Similar to the need for belonging, bored people often report that they feel a limited sense of meaning. It's a fundamental human need to have a larger purpose and to feel like we're part of something bigger than ourselves. When people are bored, they're more likely to feel less meaning in their lives. If you want to reduce boredom and increase your sense of meaning, seek work where you can make a unique contribution, or find a cause you can support with your time and talent.

If your definition of boredom is being quiet, mindful, and reflective, keep it up. But if you're struggling with real boredom and the emptiness it provokes, consider whether you might seek new connections and more significant challenges. These are the things that will genuinely relieve boredom and make you more effective in the process.

46. What have studies found about boredom?
- A) It facilitates innovative thinking.
 - B) It is a result of doing boring tasks.
 - C) It helps people connect with others.
 - D) It does harm to one's mental health.
47. What does the author say boredom might indicate?
- A) A need to be left alone.
 - B) A desire to be fulfilled.
 - C) A conflict to be resolved.
 - D) A feeling to be validated.
48. What do we learn about social media from the passage?
- A) It may be an obstacle to expanding one's connections.
 - B) It may get in the way of enhancing one's social status.
 - C) It may prevent people from developing a genuine sense of community.
 - D) It may make people feel that they ought to fit in with the outside world.
49. What does the author suggest people do to get rid of boredom?
- A) Count the likes they get on their posts.
 - B) Reflect on how they relate to others.
 - C) Engage in real-life interactions.
 - D) Participate in online discussions.
50. What should people do to enhance their sense of meaning?
- A) Try to do something original.
 - B) Confront significant challenges.
 - C) Define boredom in their unique way.
 - D) Devote themselves to a worthy cause.

Passage Two

Questions 51 to 55 are based on the following passage.

Can you remember what you ate yesterday? If asked, most people will be able to give a vague description of their main meals: breakfast, lunch, dinner. But can you be sure you've noted every snack bar in your car, or every handful of nuts at your desk? Most people will have a feeling that they've missed something out.

We originally had this suspicion back in 2016, puzzled by the fact that national statistics showed calorie consumption falling dramatically over past decades. We found reliable evidence that people were drastically under-reporting what they ate.

Now the Office for National Statistics has confirmed that we are consuming 50% more calories than our national statistics claim.

Why is this happening? We can point to at least three potential causes. One is the rise in obesity levels itself. Under-reporting rates are much higher for obese people, because they simply consume more food, and thus have more to remember.

Another cause is that the proportion of people who are trying to lose weight has been increasing over time. People who want to lose weight are more likely to under-report their eating—regardless of whether they are overweight or not. This may be driven partly by self-deception or "wishful thinking".

The final potential cause is an increase in snacking and eating out over recent decades—both in terms of how often they happen and how much they contribute to our overall energy intake. Again, there is evidence that food consumed out of the home is one of the most poorly recorded categories in surveys.

So, what's the message conveyed? For statistics, we should invest in more accurate measurement options. For policy, we need to focus on options that make it easy for people to eat fewer calories. If people do not know how much they are eating, it can be really hard for them to stick to a diet. Also, we should be looking for new ways to ensure what people eat wouldn't have much impact on their waistlines. If this works, it won't matter if they can't remember what they ate yesterday.

51. What did the author suspect back in 2016?

- A) Calorie consumption had fallen drastically over the decades.
- B) Most people surveyed were reluctant to reveal what they ate.
- C) The national statistics did not reflect the actual calorie consumption.
- D) Most people did not include snacks when reporting their calorie intake.

52. What has the Office for National Statistics verified?

- A) People's calorie intake was far from accurately reported.
- B) The missing out of main meals leads to the habit of snacking.
- C) The nation's obesity level has much to do with calorie intake.
- D) Calorie consumption is linked to the amount of snacks one eats.

53. What do we learn about obese people from the passage?

- A) They usually keep their eating habits a secret.
- B) They overlook the potential causes of obesity.
- C) They cannot help eating more than they should.
- D) They have difficulty recalling what they have eaten.

54. What often goes unnoticed in surveys on food consumption?

- A) The growing trend of eating out.
- B) The potential causes of snacking.
- C) People's home energy consumption.
- D) People's changing diet over the years.

55. What does the author suggest policymakers do about obesity?

- A) Remind people to cut down on snacking.
- B) Make sure people eat non-fattening food.
- C) Ensure people don't miss their main meals.
- D) See that people don't stick to the same diet.

Part IV

Translation

(30 minutes)

Directions: *For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.*

龙井(Longjing)是一种绿茶, 主要产自中国东部沿海的浙江省。龙井茶独特的香味和口感为其赢得了"中国名茶"的称号, 在中国深受大众的欢迎, 在海外饮用的人也越来越多。龙井茶通常手工制作, 其价格可能极其昂贵, 也可能比较便宜, 这取决于茶的生长地、采摘时间和制作工艺。龙井茶富含维生素C和其他多种有益健康的元素。经常喝龙井茶有助于减轻疲劳、延缓衰老。

本页写作题面、参考范文与逐段解析由懒笔记基于2021年6月·第3套 英语四级写作原卷整理。与试卷排版同一卷面：完整写作要求（Directions，含主题、文体、词数与署名约束）连续排印。写作是生产性任务、无 ABCD 标准答案——题面即整道题；卷面下方直接给出满足全部硬约束的参考范文、整篇中译与逐段拆解。

真题卷第3套(2021-06) • 四级

Part I

Directions:For this part, you are allowed 30 minutes to write an essay titled “Do violent video games lead to violence?”. The statement given below is for your reference. You should write at least 120 words but no more than 180 words .

A growing body of research finds that violent video games can make kids act aggressively in their real world relationships, causing an increase in violence.

【参考范文 • 165 词】 写作无唯一标准答案，以下为达标示范

Do violent video games lead to violence? While a growing body of research suggests such games can make players more aggressive, I believe they do not directly cause real violence; rather, their influence depends on the individual and the surrounding environment.

To begin with, exposure to violent scenes may indeed shape behavior. First, children who spend hours shooting and fighting on screen can gradually treat aggression as normal, and some may copy what they see when they lose their temper. However, most players clearly separate games from reality. A well-supervised teenager, for instance, can enjoy an action game after homework and still behave kindly toward classmates, because family guidance and self-control matter far more than the game itself.

In conclusion, violent video games alone do not turn ordinary people into violent ones. What truly counts is proper parental supervision and healthy habits. Therefore, rather than simply blaming the games, parents and schools should teach children to play in moderation and to tell fantasy from real life.

【参考译文】

暴力电子游戏会导致暴力吗？虽然越来越多的研究表明这类游戏可能让玩家更具攻击性，但我认为它们并不会直接导致现实中的暴力；相反，其影响取决于玩家个体以及周围的环境。

首先，接触暴力画面确实可能塑造行为。第一，那些花大量时间在屏幕上射击、打斗的孩子，可能渐渐把攻击视为常态，有些人在发脾气时会模仿所见。然而，大多数玩家能清楚地把游戏和现实分开。举例来

说，一个受到良好监管的青少年，可以在写完作业后享受一款动作游戏，却依旧待同学友善，因为家庭引导和自控远比游戏本身更重要。

总之，暴力电子游戏本身并不会把普通人变成施暴者。真正起作用的是恰当的家长监管和健康的习惯。因此，与其一味归咎于游戏，家长和学校更应教孩子适度游戏，并学会分清虚构与现实。

【第1段】首段落实开门见山亮立场。 开头 'Do violent video games lead to violence?' 用问句引题，'While a growing body of research suggests...' 用 While 让步嵌入研究，'I believe they do not directly cause real violence' 一句亮出辩证立场，正好落实 outline 第一段的『引题表态』。

【第2段】主体段走完让步-反例。 'To begin with, exposure to violent scenes may indeed shape behavior' 先让步承认坏处，'However, most players clearly separate games from reality' 转折，再用 'A well-supervised teenager, for instance...' 举例回扣中心，观点-理由-例证-回扣四步齐全。

【第3段】尾段重申加建议。 'In conclusion, violent video games alone do not turn ordinary people into violent ones' 换词重申立场，'Therefore, rather than simply blaming the games, parents and schools should teach children to play in moderation' 给出可操作建议，收束有力。

ANALYSIS • 审题与立意

这道题到底要写什么、立意是什么

动笔前先钉死本题的核心写作任务与读者语域，再定中心立意与要展开的要点——这些是本题特有的内容判断，不是通用套路。

核心任务

论证暴力游戏是否致暴力

本题要写一篇命题议论文，围绕标题问句 Do violent video games lead to violence? 表明并论证你自己的立场；参考句 A growing body of research finds that violent video games can make kids act aggressively in their real world relationships, causing an increase in violence 只是给一个研究倾向供参考，不是让你复述。

读者 • 语域

面向阅卷人的正式书面语

这是四级大作文，没有具体收信人，读者就是阅卷老师，用正式书面英语即可——不用称呼语、不用口语缩写（don't 写成 do not），也不需要署名。因为题目只说 write an essay titled 一篇 essay，不涉及应用文格式。

中心立意

不直接致暴，看人看环境

本篇中心：暴力游戏不必然导致现实暴力，其影响取决于玩家个体与家庭、成长环境。这是对标题 Doviolent video games lead to violence? 的明确回答，也对参考句 violent video games can make kids act aggressively in their real world relationships 做了有保留的回应。

要展开的要点

1. 承认游戏的负面影响

先让步一步：长期接触暴力画面确实可能让孩子把攻击当常态，呼应 make kids act aggressively，让论证显得公允、不偏激。

2. 多数玩家能分清虚实

转折反例：受监管的青少年玩完动作游戏仍待人友善，说明起决定作用的是自控与家庭引导，而非游戏本身。

3. 与其归咎不如引导

收尾对策：家长与学校应教孩子适度游戏、分清虚构与现实，而不是简单把责任推给游戏。

STRUCTURE • 谋篇与逐段

怎么分段、每段写什么、能套哪些句架

按写作家族给出现成的段落框架（每段承担什么功能），并为每段配可直接套用的 功能句架（留出填本题内容的空位）。段序与上方参考范文——对应。

第 1 段 引题表态

复述标题问句引出话题，再一句话给出自己的立场。

第 2 段 让步加论证

先承认游戏的负面影响，再用反例说明真正的决定因素是人与环境。

第 3 段 重申与建议

重申立场，并提出家长、学校该怎么做的温和建议。

第 1 段 改写标题 + 亮出辩证立场

把 Do violent video games lead to violence? 转成话题引入，并回应 causing an increase in violence 的说法，亮出『不直接致暴、要看人看环境』的立场。

让步引入 · While a growing body of research suggests ..., I believe that ...

亮明立场 · In my view, ... does not necessarily lead to ...; it depends on ...

第 2 段 让步游戏负面 + 反例翻回立场

先承认长期接触暴力画面可能让孩子 act aggressively，再举受监管青少年的例子，说明自控与家庭引导比游戏本身更起作用。

举例过渡 · A ..., for instance, can ... and still ...

让步转折 · It is true that ...; however, most ...

第 3 段 重申立场并给监管建议

重申暴力游戏不必然致暴，回应参考句 causing an increase in violence 的担忧，提出家长、学校应引导孩子适度游戏、分清虚实。

总结重申 · In conclusion, ... alone does not ...; what truly counts is ...

提出建议 · Therefore, rather than simply ..., we should ...

REVIEW · 自检避坑

本题在四个评分维度怎样算达标、容易在哪丢分

按阅卷四维（内容切题 / 结构连贯 / 语言准确 / 字数格式）给出本题达标要点，并把最容易踩的低分写法摆出来 + 给改法 —— 这是写作版的「狠拆诱人错项」。

内容切题**紧扣因果论题并表态**

本题必须绕着 Do violent video games lead to violence? 的因果关系谈并给出自己立场，最易失分是只复述 The statement given below is for your reference 的研究而始终不表态。

结构连贯**三段分工加过渡词串联**

本题三段应分别承担引题、论证、收尾；用 To begin with、However、In conclusion 等衔接，避免段落之间硬跳。

语言准确**用地道因果搭配**

本题宜用 lead to、be exposed to、aggressive behavior 等搭配表因果与态度，避免把『导致』生硬直译成累赘结构。

字数格式**卡住上下限不注水**

本题有 You should write at least 120 words but no more than 180 words 的硬性上下限，低于或超过都不达标，收尾时务必核对。

典型低分写法 • 反面示例与改法

只复述研究不表态

反面示例：'Some research finds that violent games make kids aggressive. Games are popular among teenagers.'——通篇搬材料没立场。改成：'While research links violent games to aggression, I believe they do not directly cause violence.'

只喊结论无例证

反面示例：'Violent games are not the real reason. People should be blamed.'——只有断言。改成：'Violent games are not the sole cause; a well-supervised teenager, for instance, can play them and still treat others kindly.'

照抄标题不展开

反面示例：直接以标题问句作首句，然后大谈游戏画面多精美。改成：'Do violent video games really lead to violence? This question deserves a closer look.' 并紧扣因果展开。

Part III Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Nowadays you can't buy anything without being asked to provide a rating of a company's performance on a five-star scale.

如今，你买任何东西都会被要求用五星制为公司的表现评分。

I've been asked to rate my "store 26 " on the EFTPOS terminal before I can pay. Even the most 27 activities, such as calling Telstra or picking up a parcel from Australia Post, are followed by texts or emails with surveys asking, "How did we do?"

我甚至在EFTPOS终端机上被要求为"购物体验"评分后才能付款。即使是最普通的活动，比如致电Telstra或从Australia Post取包裹，之后也会收到短信或邮件调查，询问"我们做得怎么样？"

Online purchases are 28 followed up by a customer satisfaction survey. Companies are so 29 for a hit of stars that if you delete the survey the company sends you another one.

网上购物后通常会有客户满意度调查跟进。公司如此渴望获得星级评价，如果你删除调查问卷，公司还会再给你发一份。

We're 30 to rate our apps when we've barely had a chance to use them. One online course provider I use asks you what you think of the course after you've only completed 31 2 per cent of it.

我们刚开始使用应用程序时就被提示进行评分。我使用的一家在线课程提供商在你只完成大约百分之二的课程后就询问你对课程的看法。

Economist Jason Murphy says that companies use customer satisfaction ratings because a 32

display of star feedback has become the nuclear power source of the modern economy.

经济学家Jason Murphy表示，公司使用客户满意度评分是因为光鲜亮丽的星级反馈展示已成为现代经济的核心动力源。

However, you can't help but 33 if these companies are basing their business on fabrications(捏造的东西). I 34 that with online surveys I just click the 35 that's closest to my mouse cursor(光标) to get the damn thing off my screen. Often the star rating I give has far more to do with the kind of day I'm having than the purchase I just made.

然而，你不禁会怀疑这些公司是否将其业务建立在虚假信息之上。我承认，对于在线调查，我只是点击离鼠标光标最近的选项，好把这该死的东西从屏幕上弄走。我给出的星级评分往往更多地与我当天的心情有关，而非我刚刚完成的购买。

- | | |
|----------------|--------------|
| A) announce | I) roughly |
| B) commonplace | J) routinely |
| C) confess | K) shining |
| D) desperate | L) showering |
| E) experience | M) variety |
| F) fascinated | N) voyage |
| G) option | O) wonder |
| H) prompted | |

26. I've been asked to rate my "store (26)" on the EFTPOS terminal

【答案】 **E) experience** (名词)

【词性槽】 引号内 store 后作复合名词

【依据】 为「购物体验」打分

rate my "store (26)", 被要求打分的对象正是「store experience (购物体验)」——这是英语里固定说法。结合全文都在讲「给体验/服务打星」，experience 完全契合。

【竞争词】 M) variety 义不搭，不评「种类」

variety 是「种类、多样性」，「store variety」指商品种类，但作者通篇评的是服务/体验的星级，不是评商品多不多；与 rate 的对象不符。

N) voyage 义不搭，航行无关

voyage 是「航行、海上旅程」，与在 EFTPOS 刷卡机上为购物打分的场景毫无关系，明显是干扰词。

27. Even the most __(27)__ activities, such as calling Telstra...

【答案】 **B) commonplace** (形容词)

【词性槽】 the most 后、名词 activities 前作定语

【依据】 「最平常的」活动也被评分

Even the most __(27)__ activities, such as calling Telstra or picking up a parcel..., 连「最司空见惯的」活动——打个电话、取个包裹——都被要求评分。commonplace (平常的、司空见惯的) 正好和 Even (连.....都) 形成「连最普通的也不放过」的强调。

28. Online purchases are __(28)__ followed up by a customer satisfaction survey

【答案】 **J) routinely** (副词)

【词性槽】 be 与过去分词间修饰动词，要副词

【依据】 「例行地」跟进调查

Online purchases are __(28)__ followed up by a customer satisfaction survey, 网购后「例行地、惯常地」会收到满意度调查——routinely (例行地) 正好表达这种司空见惯、每次都来的常态，呼应全文「评分无处不在」。

29. Companies are so __(29)__ for a hit of stars that...

【答案】 **D) desperate** (形容词)

【词性槽】 be 动词 so 后作表语，要形容词

【依据】 急切渴望星星

Companies are so __(29)__ for a hit of stars that if you delete the survey the company sends you another one., 公司「极度渴望」一点点好评，以至于你删了问卷它再发一份。desperate for (极度渴望.....) 是固定搭配，正好表达这种不顾一切的迫切。

【竞争词】 F) fascinated 搭配是 by, 不搭 for

fascinated (着迷的) 一般搭 fascinated by/with, 不说 fascinated for; 而且「着迷」程度上达不到「删了再发」的那种迫切，与 so...that 的夸张语气不符。

K) shining 义不搭，留给 32 题

shining 是「闪亮的」，描述物体发光，不能描述公司「渴望」的心理状态；它更适合 32 题 a __(32)__ display of star feedback 修饰星星的「闪亮陈列」。

【易错】 最具迷惑性的错误词是 F) —— fascinated 看着也像「热衷」。29 题 Companies are so __(29)__ for a hit of stars 处，fascinated (着迷的) 词性对、也像「热衷好评」，颇具迷惑性。但它搭 by 不搭 for，且程度达不到「删了再发」的迫切。防坑：desperate for 才是固定搭配，fascinated 用 by。

30. We're __(30)__ to rate our apps when we've barely had a chance to use them

【答案】 **H) prompted** (动词)

【词性槽】 be 后接过去分词作被动谓语

【依据】 被「催促/提示」去评分

We're __(30)__ to rate our apps when we've barely had a chance to use them, 我们刚下载、还没怎么用, 就被「催着/提示着」去给 app 打分。be prompted to do (被提示/被催促去做) 是固定搭配, 正好表达这种被系统弹窗催评分的场景。

【竞争词】 L) showering 搭配反向, 且非分词形

shower 表「倾泻、大量给予」常用 shower sb. with sth., 是「往某人身上倒东西」, 方向是给予而非催促; 这里需要的是「我们被催去评分」, be showering to rate 既不合搭配也讲不通。

31. you've only completed __(31)__ 2 per cent of it

【答案】 **I) roughly** (副词)

【词性槽】 数字前修饰百分比, 要副词

【依据】 修饰数字表「大约」

completed __(31)__ 2 per cent of it, 作者强调「只完成大约 2%」就被要求评分, roughly (大约) 恰好修饰具体数字 2 per cent, 语义和搭配都顺。

【竞争词】 J) routinely 义不搭, 不修饰数字

routinely 意为「例行地、惯常地」, 修饰的是反复发生的动作, 不能用来修饰一个具体数字 2 per cent。说「例行地 2%」讲不通。

32. a __(32)__ display of star feedback

【答案】 **K) shining** (形容词)

【词性槽】 冠词 a 后、名词 display 前作定语

【依据】 「闪亮的」星级陈列

a __(32)__ display of star feedback has become the nuclear power source of the modern economy, 把星级好评比作现代经济的核电源, 用 shining (闪亮的) 修饰这种「星星陈列」既贴合星星发光的意象, 又有夸张的修辞色彩。

【竞争词】 F) fascinated 只修饰人, 不修饰物

fascinated (着迷的) 描述的是人「被吸引」的心理状态, 不能修饰 display (陈列) 这样的事物。「a fascinated display」不成立。

33. you can't help but __(33)__ if these companies are basing their business on fabrications

【答案】 **O) wonder** (动词)

【词性槽】 情态短语后接动词原形

【依据】 忍不住「纳闷/想知道」

you can't help but __(33)__ if these companies are basing their business on fabrications, 作者忍不住「纳闷」这些公司是不是在拿捏造的数据做生意。wonder if (想知道是否、纳闷) 是固定搭配, 正好引出这个疑问。

【竞争词】 A) announce 义反, 不接 if 表疑问

announce 是「宣布」, 表示对外公开声明, 与「忍不住产生疑问」的语气相反, 也不和 if 从句构成「想知道是否」的搭配。

C) confess 义偏, 且要留给 34 题

confess 是「坦白、承认」, 更适合 34 题 I __(34)__ that... 那种「我承认……」的坦白语境; can't help but confess if... 语义也别扭。它要留给后面真正坦白的空。

【易错】 最具迷惑性的错误词是 C) —— confess 也是动词易抢位。33 题 you can't help but __(33)__ if... 处, confess (坦白) 词性也对、也像在「说什么」, 容易被误填。但 wonder if (纳闷是否) 才是固定搭配, 且 confess 要留给 34 题。防坑: 认准 wonder if 表内心疑问, confess 接的是 that 从句的招供。

34. I __(34)__ that with online surveys I just click...

【答案】 **C) confess** (动词)

【词性槽】 主语 I 后缺谓语, 要动词

【依据】 坦白自己打分很随意

I __(34)__ that with online surveys I just click the __(35)__ that's closest to my mouse cursor, 作者要「坦白」一件不太光彩的事——自己评分时只是随手乱点。confess that (坦白、承认) 正好引出这种自我招供的语气。

【竞争词】 A) announce 语气不符, 非自我招供

announce (宣布) 是正式对外公布, 而这里是作者私下坦白自己的小毛病, 带点不好意思的口吻。用「宣布我随便乱点」语气完全不对。

35. I just click the __(35)__ that's closest to my mouse cursor

【答案】 **G) option** (名词)

【词性槽】 the 后作宾语，要名词

【依据】 点最近的「选项」

I just click the __(35)__ that's closest to my mouse cursor(光标)，作者说自己随便点离光标最近的那个——评分时点的正是星级「选项」。option (选项) 和 click、closest to my mouse cursor 完全自洽。

【竞争词】 E) experience 已用且义不搭

experience (体验) 已在 26 题用掉，且「click the experience」语义不通——你点的是屏幕上一个可点的东西，不是「体验」。

M) variety 义不搭，无法被「点」

variety 意为「多样、种类」，「click the variety」讲不通——光标最近的不是「多样性」，而是一个具体可点的选项。

WORD BANK · 词库分类表

15 个候选词 · 词性与词义

选词填空文后的共享词库共 **15** 个词 (A–O)，为 10 个空各选一个、每词最多用一次。下面给出每个词的词性与中文词义；标注「用于第 N 空」的 10 个为答案，其余 5 个为干扰词。

A) **announce** (动词)

宣布、宣告

干扰词 · 未选用

B) **commonplace** (形容词) (名词)

平常的、司空见惯的；平常事

用于第 27 空

C) **confess** (动词)

坦白、承认

用于第 34 空

D) **desperate** (形容词)

极度渴望的、不顾一切的

用于第 29 空

E) **experience** (名词) (动词)

体验、经历；经历 (某事)

用于第 26 空

F) **fascinated** (形容词)

着迷的、被吸引的

干扰词 · 未选用

G) **option** 名词

选项、选择

用于第 35 空

H) **prompted** 动词 形容词

被提示/被催促（去做）；prompt 的过去式或过去分词

用于第 30 空

I) **roughly** 副词

大约、粗略地

用于第 31 空

J) **routinely** 副词

例行地、惯常地

用于第 28 空

K) **shining** 形容词 动词

闪亮的、发光的

用于第 32 空

L) **showering** 动词 形容词

倾泻、大量给予；shower 的现在分词

干扰词 · 未选用

M) **variety** 名词

多样、种类

干扰词 · 未选用

N) **voyage** 名词 动词

航行、旅程

干扰词 · 未选用

O) **wonder** 动词 名词

想知道、纳闷；惊奇

用于第 33 空

全文主旨

吐槽五星评分泛滥且失真

全文是作者对当下「买什么都要打分」现象的吐槽：Nowadays you can't buy anything without being asked to provide a rating of a company's performance on a five-star scale. 开篇就定调——五星评分无处不在；后文进一步质疑这些评分根本不可靠，连作者自己打分都很随意。抓住「评分泛滥 + 作者持怀疑/调侃态度」这条主线，后面辨义、代入验证就有了统一的工作台。

DISTRACTORS · 干扰词复盘

这 5 个词始终没被任何空选用

词库 15 词里有 5 个是命题人埋的干扰词——它们词性看着也对、词义也沾点边，却不该填入任何一个空。下面逐个剖析它们最像哪个空的答案、为什么是陷阱。

A) **announce** 像 34 题的动词

announce 是动词，最像 34 题 I __(34)__ that... 的答案——都能接 that 从句。但 announce 是正式「宣布」，而作者是私下「坦白」自己乱点，感情色彩不符，所以输给 confess。识破点：看是中性公开还是带愧意的招供。

F) **fascinated** 像 29 或 32 题的形容词

fascinated 是形容词，词性与 29 题、32 题都对得上，看着也沾「着迷于评分」的边。但它只修饰人、且搭 by 而非 for，既进不了 so __(29)__ for a hit of stars，也修饰不了 display。识破点：fascinated 修饰人、用 by。

L) **showering** 像 30 题的动词

showering 可作动词，最像 30 题 We're __(30)__ to rate 的被动谓语。但 shower 是「倾泻、大量给予 (shower sb. with sth.)」，方向是给予而非催促，套不进「我们被催去评分」。识破点：shower 是 with 搭配的「倾倒」，不表催促。

M) **variety** 像 26 或 35 题的名词

variety 是名词，词性对得上 26、35 两个名词空。但「store variety (商品种类)」「click the variety」都与「评体验、点选项」的语境不符——作者评的是体验不是种类。识破点：通篇评的是 experience，不是 variety。

N) **voyage** 几乎无迷惑性的名词

voyage (航行) 虽是名词，理论上能填名词空，但「航行」与刷卡评分、点选项的语境毫无交集，是最容易排除的纯干扰词。识破点：词义和评分话题八竿子打不着。

SENTENCE INSIGHTS • 句子精讲

5 句真题句逐层精讲

下列真题句各有独立的句子解析页——中文翻译、结构树逐层拆解、成分与时态、考点讲解与真题高频词。点击句子进入完整解析。

Nowadays you can't buy anything without being asked to provide a rating of a company's performance on a five-star scale.

第1段，第1句

简单句配合 without doing 的方式状语结构在四六级和考研阅读中较为常见，尤其是 without being done（被动动名词）这种表达方式经常用于描述某种普遍现象或无法避免的情况。掌握这种结构后可以在阅读和写作中迁移运用，具有较好的典型性

Even the most commonplace activities, such as calling Telstra or picking up a parcel from Australia Post, are followed by texts or emails with surveys asking, "How did we do?"

第2段，第2句

被动语态加后置定语的主句结构,以及现在分词引出间接引语的宾语从句,都是四六级和考研阅读中的常见句式,具有较强的代表性,掌握后可以迁移到大量类似句子的理解中。

Companies are so desperate for a hit of stars that if you delete the survey the company sends you another one.

第3段，第2句

句子涵盖主系表结构、双宾语结构（send you another one）、结果状语从句和条件状语从句，且条件从句插入位置较特殊，适合训练复杂修饰关系下的成分识别和从句归属判断，对基础较弱的学习者有较高练习价值。

Economist Jason Murphy says that companies use customer satisfaction ratings because a shining display of star feedback has become the nuclear power source of the modern economy.

第5段，第1句

主句 + 宾语从句 + 内嵌状语从句的结构在四六级和考研阅读中极为常见。特别是表达某人陈述观点（says/argues/claims + that 从句），以及从句内解释原因（because 从句），这是新闻报道和学术文章的典型句式，迁移复用价值很高。

However, you can't help but wonder if these companies are basing their business on fabrications(捏造的东西).

第6段，第1句

主句 + 宾语从句的结构在四六级和考研真题中高频出现,if 引导名词性从句和现在进行时的组合也很典型,是阅读理解中的常见句式

真题卷第3套(2021-06) · 四级

Part III Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on **Answer Sheet 2**.

Science of setbacks: How failure can improve career prospects

- A) How do early career setbacks affect our long-term success? Failures can help us learn and overcome our fears. But disasters can still wound us. They can screw us up and set us back. Wouldn't it be nice if there was genuine, scientifically documented truth to the expression "what doesn't kill you makes you stronger"?

早期职业挫折如何影响我们的长期成功?失败能帮助我们学习并克服恐惧。但灾难仍然会伤害我们。它们可能搞砸我们并使我们倒退。如果"杀不死你的会使你更强大"这句话有真正的、有科学记载的真实性,那不是很好吗?

- B) One way social scientists have probed the effects of career setbacks is to look at scientists of very similar qualifications. These scientists, for reasons that are mostly arbitrary, either just missed getting a research grant or just barely made it. In social sciences, this is known as examining "near misses" and "narrow wins" in areas where merit is subjective. That allows researchers to measure only the effects of being chosen or not. Studies in this area have found conflicting results. In the competitive game of biomedical science, research has been done on scientists who narrowly lost or won grant money. It suggests that narrow winners become even bigger winners down the line. In other words, the rich get richer.

社会科学家探究职业挫折影响的一种方法是观察资质非常相似的科学家。这些科学家,出于大部分是任意的原因,要么刚好错失研究资助,要么勉强获得。在社会科学中,这被称为在优劣主观判断的领域中考察"险些失败"和"险胜"。这使研究人员能够只衡量被选中或未被选中的影响。该领域的研究发现了相

互矛盾的结果。在生物医学科学的竞争游戏中,对险胜或险败获得资助金的科学家进行了研究。这表明险胜者在后续会成为更大的赢家。换句话说,富者愈富。

- C) A 2018 study published in the Proceedings of the National Academy of Sciences, for example, followed researchers in the Netherlands. Researchers concluded that those who just barely qualified for a grant were able to get twice as much money within the next eight years as those who just missed out. And the narrow winners were 50 percent more likely to be given a professorship.

例如,2018年发表在《美国国家科学院院刊》上的一项研究跟踪了荷兰的研究人员。研究人员得出结论,那些勉强获得资助资格的人在接下来八年内能够获得的资金是那些险些错失的人的两倍。而且险胜者获得教授职位的可能性高出50%。

- D) Others in the US have found similar effects with National Institutes of Health early-career fellowships launching narrow winners far ahead of close losers. The phenomenon is often referred to as the Matthew effect, inspired by the Bible's wisdom that to those who have, more will be given. There's a good explanation for the phenomenon in the book *The Formula: The Universal Laws of Success* by Albert Laszlo Barabasi. According to Barabasi, it's easier and less risky for those in positions of power to choose to hand awards and funding to those who've already been so recognized.

美国的其他研究发现,美国国立卫生研究院早期职业奖学金也有类似效应,使险胜者远远领先于接近的失败者。这种现象通常被称为马太效应,灵感来自《圣经》中"凡有的,还要加给他"的智慧。Albert Laszlo Barabasi在《公式:成功的普遍法则》一书中对这一现象有很好的解释。根据Barabasi的观点,对于那些处于权力位置的人来说,选择将奖项和资金授予那些已经获得认可的人更容易、风险更小。

- E) This is bad news for the losers. Small early career setbacks seem to have a disproportionate effect down the line. What didn't kill them made them weaker. But other studies using the same technique have shown there's sometimes no penalty to a near miss. Students who just miss getting into top high schools or universities do just as well later in life as those who just manage to get accepted. In this case, what didn't kill them simply didn't matter. So is there any evidence that setbacks might actually improve our career prospects? There is now.

这对失败者来说是坏消息。早期职业的小挫折似乎在后续产生不成比例的影响。没有杀死他们的东西使他们变得更弱。但使用相同技术的其他研究表明,有时险些失败并不会受到惩罚。刚好没能进入顶尖高中或大学的学生在以后的生活中表现与那些勉强被录取的学生一样好。在这种情况下,没有杀死他们的东西根本无关紧要。那么有没有证据表明挫折实际上可能改善我们的职业前景呢?现在有了。

- F) In a study published in *Nature Communications*, Northwestern University sociologist Dashun Wang tracked more than 1,100 scientists who were on the border between getting a grant and missing out between 1990 and 2005. He followed various measures of performance over the next decade. These included how many papers they authored and how influential those papers were, as measured by the number of subsequent citations. As expected, there was a much higher rate of attrition(减员) among scientists who didn't get grants. But among those who stayed on, the close losers performed even better than the narrow winners. To make sure this wasn't by chance, Wang conducted additional tests using different performance measures. He examined how many times people were first authors on influential studies, and the like.

在《自然-通讯》上发表的一项研究中,西北大学社会学家王大顺跟踪了1100多名在1990年至2005年间处于获得资助和错失资助边缘的科学家。他在接下来的十年中跟踪了各种绩效指标。这些指标包括他

们撰写了多少篇论文,以及这些论文的影响力如何,影响力通过后续引用次数来衡量。正如预期的那样,没有获得资助的科学家流失率要高得多。但在那些留下来的人中,险些失败者的表现甚至优于险胜者。为了确保这不是偶然,王进行了额外的测试,使用不同的绩效指标。他考察了人们在有影响力的研究中担任第一作者的次数等等。

- G) One straightforward reason close losers might outperform narrow winners is that the two groups have comparable ability. In Wang's study, he selected the most determined, passionate scientists from the loser group and culled(剔除) what he deemed the weakest members of the winner group. Yet the persevering losers still came out on top. He thinks that being a close loser might give people a psychological boost, or the proverbial kick in the pants.

险些失败者可能优于险胜者的一个直接原因是两组人具有相当的能力。在王的研究中,他从失败者组中选择了最坚定、最有激情的科学家,并剔除了他认为赢家组中最弱的成员。然而坚持不懈的失败者仍然名列前茅。他认为成为一个险些失败者可能会给人们心理上的激励,或者所谓的当头棒喝。

- H) Utrecht University sociologist Arnout van de Rijt was the lead author on the 2018 paper showing the rich get richer. He said the new finding is apparently reasonable and worth some attention. His own work showed that although the narrow winners did get much more money in the near future, the actual performance of the close losers was just as good.

乌得勒支大学社会学家Arnout van de Rijt是2018年那篇显示富者愈富论文的第一作者。他说这一新发现显然是合理的,值得关注。他自己的研究表明,尽管险胜者确实在不久的将来获得了更多的钱,但险些失败者的实际表现同样出色。

- I) He said the people who should be paying regard to the Wang paper are the funding agents who distribute government grant money. After all, by continuing to pile riches on the narrow winners, the taxpayers are not getting the maximum bang for their buck if the close losers are performing just as well or even better. There's a huge amount of time and effort that goes into the process of selecting who gets grants, he said, and the latest research shows that the scientific establishment is not very good at distributing money. "Maybe we should spend less money trying to figure out who is better than who," he said, suggesting that some more equal dividing up of money might be more productive and more efficient. Van de Rijt said he's not convinced that losing out gives people a psychological boost. It may yet be a selection effect. Even though Wang tried to account for this by culling the weakest winners, it's impossible to know which of the winners would have quit had they found themselves on the losing side.

他说应该关注王的论文的人是那些分配政府资助资金的资助机构。毕竟,如果险些失败者的表现同样好甚至更好,通过继续将财富堆积在险胜者身上,纳税人并没有获得最大的性价比。他说,选择谁获得资助的过程投入了大量的时间和精力,最新的研究表明科学机构在分配资金方面做得并不好。"也许我们应该少花钱试图弄清楚谁比谁更好,"他说,并建议更平等地分配资金可能更有成效、更有效率。Van de Rijt说他不相信失败会给人们心理上的激励。这可能仍然是一种选择效应。尽管王试图通过剔除最弱的赢家来解决这个问题,但无法知道如果这些赢家发现自己处于失败一方,他们中哪些人会退出。

- J) For his part, Wang said that in his own experience, losing did light a motivating fire. He recalled a recent paper he submitted to a journal, which accepted it only to request extensive editing, and then

reversed course and rejected it. He submitted the unedited version to a more respected journal and got accepted.

就王本人而言,他说根据自己的经验,失败确实点燃了激励之火。他回忆起最近向一家期刊提交的一篇论文,该期刊接受了它,但要求进行大量编辑,然后改变方向拒绝了它。他将未经编辑的版本提交给一家更受尊敬的期刊并被接受了。

K) In sports and many areas of life, we think of failures as evidence of something we could have done better. We regard these disappointments as a fate we could have avoided with more careful preparation, different training, a better strategy, or more focus. And there it makes sense that failures show us the road to success. These papers deal with a kind of failure people have little control over—rejection. Others determine who wins and who loses. But at the very least, the research is starting to show that early setbacks don't have to be fatal. They might even make us better at our jobs. Getting paid like a winner, though? That's a different matter.

在体育和生活的许多领域,我们认为失败是我们本可以做得更好的证据。我们把这些失望视为我们本可以通过更仔细的准备、不同的训练、更好的策略或更专注而避免的命运。在这种情况下,失败向我们展示通往成功的道路是有道理的。这些论文处理的是一种人们几乎无法控制的失败——拒绝。别人决定谁赢谁输。但至少,研究开始表明早期挫折不一定是致命的。它们甚至可能使我们在工作中做得更好。不过,像赢家一样获得报酬?那是另一回事。

陈述句与逐句解析

36. Being a close loser could greatly motivate one to persevere in their research.

成为险败者可能会极大地激励人们在研究中坚持不懈。

【答案】 G 段 (强锚点)

【锚点】 「close loser」 + 「motivate to persevere」 这组独特概念组合

【定位】 He thinks that being a close loser might give people a psychological boost, or the proverbial kick in the pants.

他认为,作为险些落选的人,可能反而会给人一种心理上的推力,或者俗话说的那种「屁股上挨一脚」的督促。

【改写】 Being a close loser ↔ being a close loser

术语逐字复现

greatly motivate one to persevere in their research ↔

might give people a psychological boost, or the proverbial kick in the pants

抽象学院词 ↔ 形象俗语

【辨邻】 J 本段是 Wang 用亲历的「论文先被拒后被更好期刊接受」轶事说明「losing did light a motivating fire」,与「close loser ... greatly motivate」语义接近,但题干是对「close loser」这一群体作机制概括,本段只是个人例证。

in his own experience, losing did light a motivating fire

37. Grant awarders tend to favor researchers already recognized in their respective fields.

资助评审者倾向于偏爱在各自领域已获认可的研究人员。

【答案】 **D** 段（强锚点）

【锚点】 「Grant awarders」 偏爱 「already recognized」

【定位】 According to Barabasi, it's easier and less risky for those in positions of power to choose to hand awards and funding to those who've already been so recognized.

根据 Barabasi 的看法，对掌权者而言，把奖项与资助交给那些已经被认可过的人，更省事、风险也更小。

【改写】 Grant awarders ↔ **those in positions of power to choose to hand awards and funding**

上位「掌权者」收窄为下位「资助评审方」

tend to favor ↔

it's easier and less risky ... to choose to hand awards and funding to those who've already been so recognized

「更容易、风险更小地选择给...」 ≈ 「倾向偏爱」

researchers already recognized in their respective fields ↔

those who've already been so recognized

「already recognized」逐字复现

【辨邻】 **B** 「the rich get richer」与「tend to favor」相关，但本段没解释「为何评审方倾向于把钱再给已被认可者」，而题干要的是这一机制本身——机制的展开在「Matthew effect」段。

the rich get richer

38. Suffering early setbacks might help people improve their job performance.

遭受早期挫折可能有助于人们提高工作表现。

【答案】 **K** 段（弱锚点）

【锚点】 「early setbacks」改善「job performance」这一总结性命题

【定位】 But at the very least, the research is starting to show that early setbacks don't have to be fatal. They might even make us better at our jobs.

但至少，这些研究开始表明：早期的挫折未必致命，它们甚至可能让我们把工作做得更好。

【改写】 Suffering early setbacks ↔ **early setbacks**

「early setbacks」逐字复现

might help people improve their job performance ↔ **They might even make us better at our jobs**
情态词 might 一致 + 名词化与比较级同义

【辨邻】 F 本段「the close losers performed even better than the narrow winners」是对 Wang 那项追踪研究的具体结论，没有把它扩展为「early setbacks 普遍可能 improve job performance」这种全文总结。题干用 people 这种泛指主语，匹配的应是收束全文的总结段。

the close losers performed even better than the narrow winners

E 本段强调「Small early career setbacks seem to have a disproportionate effect down the line」的负面后果与「made them weaker」，与「improve job performance」的正向陈述极性相反。

What didn't kill them made them weaker

39. Research by social scientists on the effects of career setbacks has produced contradictory findings.

社会科学家关于职业挫折影响的研究产生了相互矛盾的发现。

【答案】 B 段（强锚点）

【锚点】 「social scientists」研究结论「contradictory」

【定位】 Studies in this area have found conflicting results.
该领域的各项研究得出过相互矛盾的结论。

【改写】 Research by social scientists on the effects of career setbacks ↔

One way social scientists have probed the effects of career setbacks

主语与对象逐字对应

has produced contradictory findings ↔ **Studies in this area have found conflicting results**
「contradictory findings」≈「conflicting results」

40. It is not in the best interest of taxpayers to keep giving money to narrow winners.

持续向险胜者提供资金不符合纳税人的最佳利益。

【答案】 I 段（强锚点）

【锚点】 「not in the best interest of taxpayers」+ 「narrow winners」

【定位】 After all, by continuing to pile riches on the narrow winners, the taxpayers are not getting the maximum bang for their buck if the close losers are performing just as well or even better.
毕竟，如果险些落选者表现得一样好甚至更好，那么继续把钱堆在险胜者身上，纳税人就没拿到他们花的钱该有的最大回报。

【改写】 not in the best interest of taxpayers ↔

the taxpayers are not getting the maximum bang for their buck

习语翻译后与抽象短语语义等值

to keep giving money to narrow winners ↔ **by continuing to pile riches on the narrow winners**
「keep giving」≈「continuing to pile」

【辨邻】 **H** 本段「the actual performance of the close losers was just as good」只是对 Wang 论文的同行评价，没替「纳税人」算账，与题干的核心视角不符。

the actual performance of the close losers was just as good

41. Scientists who persisted in research without receiving a grant made greater achievements than those who got one with luck, as suggested in one study.

一项研究表明，未获得资助但坚持研究的科学家比那些凭运气获得资助的科学家取得了更大的成就。

【答案】 **F** 段（强锚点）

【锚点】 「persisted without receiving a grant」 「greater achievements」 「one study」

【定位】 But among those who stayed on, the close losers performed even better than the narrow winners.

但在那些坚持留下来的人里，险些落选者的表现甚至比那些险胜者更好。

【改写】 Scientists who persisted in research without receiving a grant ↔ among those who stayed on
「persisted」 ≈ 「stayed on」

made greater achievements than those who got one with luck ↔

the close losers performed even better than the narrow winners

「got one with luck」 = narrow winners; 「greater achievements」 = performed even better

as suggested in one study ↔

tracked more than 1,100 scientists who were on the border between getting a grant and missing out between 1990 and 2005

「one study」指向 Wang 这项追踪研究

【辨邻】 **H** 本段「the actual performance of the close losers was just as good」是 van de Rijt 对 Wang 论文的复述与评价，并非这项研究本身的发现段。题干用「one study」+ 「suggested」更直接指向原研究段。

the actual performance of the close losers was just as good

42. A research paper rejected by one journal may get accepted by another.

被一家期刊拒绝的研究论文可能被另一家期刊接受。

【答案】 **J** 段（强锚点）

【锚点】 「research paper rejected」 「another」 「accepted」这一具体轶事

【定位】 He submitted the unedited version to a more respected journal and got accepted.

他把那份未经修改的稿子投到了一家更受尊敬的期刊，结果被接收了。

【改写】 A research paper rejected by one journal ↔

a recent paper he submitted to a journal, which accepted it only to request extensive editing,
and then reversed course and rejected it

「被拒」对应「最终又被退稿」

may get accepted by another ↔

He submitted the unedited version to a more respected journal and got accepted

「被另一家接受」逐句对应

43. According to one recent study, narrow winners of research grants had better chances to be promoted to professors.

根据最近的一项研究,研究资助的险胜者有更好的机会晋升为教授。

【答案】 C 段 (强锚点)

【锚点】 「narrow winners」 「better chances to be promoted to professors」

【定位】 And the narrow winners were 50 percent more likely to be given a professorship.

并且,那些险些胜出的人评上教授的概率比落选者高 50%。

【改写】 narrow winners of research grants ↔ those who just barely qualified for a grant

「narrow winners」具体化为「刚够格者」

better chances to be promoted to professors ↔

50 percent more likely to be given a professorship

「better chances」由「50% more likely」量化落地

According to one recent study ↔

A 2018 study published in the Proceedings of the National Academy of Sciences

「one recent study」对应那项 2018 年 PNAS 研究

【辨邻】 D 本段「Others in the US have found similar effects with National Institutes of Health early-career fellowships launching narrow winners far ahead of close losers」只笼统说险胜者「far ahead」(远远领先),没量化「评教授概率高 50%」这种具体指标,对不上题干核心指纹。

Others in the US have found similar effects with National Institutes of Health early-career fellowships launching narrow winners far ahead of close losers

44. One researcher suggests it might be more fruitful to distribute grants on a relatively equal basis.

一位研究人员建议,在相对平等的基础上分配资助可能更有成效。

【答案】 I 段 (强锚点)

【锚点】 「distribute grants」 「relatively equal basis」

【定位】 "Maybe we should spend less money trying to figure out who is better than who," he said, suggesting that some more equal dividing up of money might be more productive and more efficient.

「也许我们应当少花点钱去判断谁比谁更强，」他说，并建议把钱较为平均地分配，可能效率更高、更出成果。

【改写】 more fruitful ↔ **more productive and more efficient**

「fruitful」≈「productive / efficient」

distribute grants on a relatively equal basis ↔ **some more equal dividing up of money**

「relatively equal basis」≈「more equal」

One researcher suggests ↔

suggesting that some more equal dividing up of money might be more productive and more efficient

「suggests」逐字复现

【辨邻】 H 本段「He said the new finding is apparently reasonable and worth some attention」是 van de Rijt 对 Wang 论文的初步评价，没提出「distribute grants on a relatively equal basis」这种政策主张——政策建议在下一段 (I) 才给。

He said the new finding is apparently reasonable and worth some attention

45. Minor setbacks in their early career may have a strong negative effect on the career of close losers.

早期职业生涯中的小挫折可能对险败者的职业生涯产生强烈的负面影响。

【答案】 **E** 段 (强锚点)

【锚点】 「Minor setbacks」 「strong negative effect」 「close losers」

【定位】 Small early career setbacks seem to have a disproportionate effect down the line.

早期职业生涯里的小挫折，似乎会在后续产生不成比例的（巨大）影响。

【改写】 Minor setbacks in their early career ↔ **Small early career setbacks**

「Minor」≈「Small」、 「in their early career」≈「early career」

may have a strong negative effect ↔ **seem to have a disproportionate effect down the line**

「disproportionate」+ 下文「weaker」共同等于「strong negative」

on the career of close losers ↔ **This is bad news for the losers**

「close losers」对应本段开头「the losers」

【辨邻】 B 本段「narrow winners become even bigger winners down the line」是对「赢家更赢」的中性描述，没有「disproportionate effect」这种「不成比例」的强度论断，与「strong negative effect」对不上。

narrow winners become even bigger winners down the line

D 本段「launching narrow winners far ahead of close losers」虽提及「far ahead of close losers」，但主语是「narrow winners」（赢家被推到远前方）；题干主语是「close losers」遭受负面影响，应取以输家为主语的段（E）。

launching narrow winners far ahead of close losers

PARAGRAPH MAP • 段落主旨图

11 个段落各讲了什么

逐段一句主旨 + 该段最具区分度的「信息指纹」，是逐句回扫定位的工作台。

A 全文引子：早期挫折对长远成功到底有何影响？提出贯穿全文的那句俗语「what doesn't kill you makes you stronger」，问它是否真有科学依据。

信息指纹 那句俗语本身

B 介绍社会科学家研究挫折的方法——比较资历相近但「near misses」和「narrow wins」的科学家；并交代该领域研究「Studies in this area have found conflicting results」（结论互相矛盾），生物医学领域有研究说「赢家通吃」。

信息指纹 结论互相矛盾这句总评

C 举一项 2018 年发表于 PNAS 的荷兰研究：刚够格拿到资助的人，八年内拿到的钱是险些落选者的两倍，「50 percent more likely to be given a professorship」（评上教授的概率高 50%）。

信息指纹 评上教授概率高 50%

D 美国 NIH 早期资助也呈现同样的「赢家更赢」现象，这被称为「Matthew effect」（马太效应），出自《圣经》「to those who have, more will be given」；Barabasi 解释说，掌权者把奖项资助再给已被认可的人，更省事、更不冒险。

信息指纹 马太效应这个术语

E 这对落选者是坏消息：「Small early career setbacks seem to have a disproportionate effect down the line」（早期小挫折在后续会产生不成比例的大影响）；但也有同方法研究显示险些落榜的学生日后表现并不差；末尾设问「挫折有没有可能反而提升前景？」并自答：有。

信息指纹 早期小挫折后续影响不成比例

F 介绍 Wang 发表于 Nature Communications 的研究：追踪 1990–2005 年间一千多名处在「中线」边缘的科学家十年；坚持下来的「close losers performed even better than the narrow winners」（险些落选者反而比侥幸胜出者表现更好）。

信息指纹 Wang 那项 1990–2005 追踪研究

G 解释为什么落选者反而更好：能力可比，但落选可能给人一种「psychological boost」（心理推力）或所谓「kick in the pants」（屁股上踹一脚的督促）。

信息指纹 心理推力 / 屁股上一脚

H Utrecht 大学社会学家 van de Rijt（2018 那篇「赢家通吃」论文一作）评价 Wang 的新发现：认为「reasonable and worth some attention」（合理且值得关注），并承认虽然险胜者短期拿到的钱更多，但「the actual performance of the close losers was just as good」（落选者的实际表现一样好）。

信息指纹 van de Rijt 对 Wang 论文的初步评价

I van de Rijt 进一步对资助机构喊话：继续把钱堆给险胜者，「the taxpayers are not getting the maximum bang for their buck」（纳税人拿不到最大回报）；他建议「some more equal dividing up of money might be more productive and more efficient」（把钱较为均等地分配可能更高效），并对「心理推力」假说持保留态度。

信息指纹 对纳税人不划算 + 建议较平均分配

J Wang 现身说法：他自己的一篇论文被一家期刊先接收再退稿，他把未改稿投到「a more respected journal」（一家更受尊敬的期刊），结果被接受——印证「输能点燃斗志」。

信息指纹 Wang 本人一篇论文先被拒后被更好期刊接受的轶事

K

全文总收束：日常生活里我们把失败视作可以靠准备/训练/策略避免的东西；但本系列论文谈的是「a kind of failure people have little control over—rejection」（一种人无法掌控的失败——被拒）。至少现有研究表明，「early setbacks don't have to be fatal. They might even make us better at our jobs」（早期挫折未必致命，甚至可能让我们工作做得更好）。

信息指纹

「早期挫折未必致命，甚至可能让我们工作做得更好」这句结论

SENTENCE INSIGHTS • 句子精讲

14 句真题句逐层精讲

下列真题句各有独立的句子解析页——中文翻译、结构树逐层拆解、成分与时态、考点讲解与真题高频词。点击句子进入完整解析。

In the competitive game of biomedical science, research has been done on scientists who narrowly lost or won grant money.

B段，第6句

“主句 + 句首状语 + 名词后接限制性定语从句”是阅读中非常常见的结构，主句里再配一个完成时被动，也很有代表性。掌握这种拆法后，迁移到考试阅读中的类似句式很方便。

In other words, the rich get richer.

B段，第8句

“主语 + 系动词 + 表语（比较级）”是常见句型，在四六级、考研阅读中时有出现，具有一定代表性。但本句过于简短、结构过于基础，不如那些包含从句或复杂修饰成分的典型长难句更具学习迁移价值。

But other studies using the same technique have shown there's sometimes no penalty to a near miss.

E段，第4句

本句结构非常典型：主句 + 宾语从句是四六级和考研阅读中的高频句式，现在完成时也是常考时态，现在分词作后置定语和 there be 句式都是常见结构。掌握本句的分析方法可以迁移到大量类似句子。句式代表性强，实用价值高。

So is there any evidence that setbacks might actually improve our career prospects?

E段，第7句

疑问句形式、there be 存在句、同位语从句解释抽象名词，这些都是四六级和考研阅读中的高频句式，学习后可迁移到大量类似结构，典型性较高。

In a study published in Nature Communications, Northwestern University sociologist Dashun Wang tracked more than 1,100 scientists who were on the border between getting a grant and missing out between 1990 and 2005.

F段，第1句

本句体现了学术文献中常见的句式特征:主句陈述研究行为,介词短语说明研究背景,定语从句限定研究对象。这种 "主句 + 限制性定语从句修饰宾语" 的结构在四六级和考研阅读中非常典型,掌握后可复用到大量类似句子的分析中。

Yet the persevering losers still came out on top.

G段，第3句

本句虽为简单句，但包含定语修饰名词、副词修饰全句和谓语、短语动词加介词短语状语等典型结构组合，这种'修饰成分 + 核心主谓 + 结果状语'的模式在四六级阅读和写作中频繁出现，具有较高迁移价值。

His own work showed that although the narrow winners did get much more money in the near future, the actual performance of the close losers was just as good.

H段，第3句

本句的 "主句 + 宾语从句 + 内嵌让步状语从句" 结构是四六级和考研阅读中的高频句式，尤其是通过 "showed that" 引出研究结论、内部用 "although" 表达让步转折的模式，在学术类文本中极为常见。掌握后可大量复用到类似句型的理解中。

After all, by continuing to pile riches on the narrow winners, the taxpayers are not getting the maximum bang for their buck if the close losers are performing just as well or even better.

I段, 第2句

"主句 + if 条件状语从句" 是四六级和考研阅读中的高频句式。主句内插入较长的介词短语作状语, 以及从句中的比较结构, 都是真题常见模式。这种结构在议论文和说明文中大量出现, 掌握后可迁移到多数学术和新闻文本。

There's a huge amount of time and effort that goes into the process of selecting who gets grants, he said, and the latest research shows that the scientific establishment is not very good at distributing money.

I段, 第3句

本句覆盖了 There be 存在句、定语从句、宾语从句(含疑问词引导)、主系表结构、动名词作宾语等多种成分类型, 且第一个主句的长主语和嵌套结构是易错高发点, 非常适合作为成分划分练习

"Maybe we should spend less money trying to figure out who is better than who," he said, suggesting that some more equal dividing up of money might be more productive and more efficient.

I段, 第4句

直接引语作宾语、现在分词作伴随状语、宾语从句、情态动词结构都是四六级和考研真题中的高频句式, 尤其是he said引出直接引语并伴随suggesting这种复杂叙述结构, 在真题阅读中经常出现, 掌握后可大量复用。

Even though Wang tried to account for this by culling the weakest winners, it's impossible to know which of the winners would have quit had they found themselves on the losing side.

I段, 第7句

本句成分丰富且包含多个易错点: 形式主语it与真正主语不定式短语的识别, 宾语从句由疑问词which引导, 双宾语find oneself结构中宾语和宾语补足语的划分, 倒装虚拟条件句中主谓识别。涵盖主谓宾补、宾语从句、状语从句等多种成分, 且有形式主语、倒装等坑点, 是优质的成分划分练习材料。

He recalled a recent paper he submitted to a journal, which accepted it only to request extensive editing, and then reversed course and rejected it.

J段, 第2句

本句体现了考研和四六级阅读中高频出现的句式特征: 主句宾语后嵌套限制性定语从句(关系代词省略)、非限制性定语从句补充说明、从句内并列谓语。这类结构在真题长难句中反复出现, 掌握后可广泛迁移。

And there it makes sense that failures show us the road to success.

K段, 第3句

形式主语 it + that 从句是四六级和考研阅读中的高频句式(如 it is clear that, it makes sense that), 双宾语结构也是常考点。掌握本句结构后, 学生可以迁移到大量类似句型, 实用性强。

Scientists who persisted in research without receiving a grant made greater achievements than those who got one with luck, as suggested in one study.

第41题题干

本句成分丰富: 主句涵盖主谓宾, 主语和比较对象都带定语从句修饰, 还有比较状语和补充说明的状语从句。定语从句内部又包含各类状语。比较从句中的谓语省略、非限制性定语从句中的被动语态省略, 都是值得练习的易错点。适合全面训练成分识别和省略结构还原

QUESTIONS & ANALYSIS • 阅读理解题和解析

阅读理解题和解析·46-50 题

本页 46-50 题的答案与逐题解析由懒笔记基于2021年6月·第3套 英语四级阅读理解（四选一）原卷逐题核对整理。与试卷排版同一卷面：先是 Directions 与 5 段原文（段首标 P1-P5 段号、逐段附中文翻译）；之后 5 道题逐题排列，每题英文题干与选项后紧接本题解析——题干与选项中译、答案、题型判定、题干拆句、定位句中英对照与逐选项对错归因。

真题卷第3套(2021-06) • 四级

Part III Section C (1)

Directions: There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

Passage One

Questions 46 to 50 are based on the following passage.

P1 Boredom has become trendy. Studies point to how boredom is good for creativity and innovation, as well as mental health. It is found that people are more creative following the completion of a tedious task. When people are bored, they have an increase in "associative thought"—the process of making new connections between ideas, which is linked to innovative thinking. These studies are impressive, but in reality, the benefits of boredom may be related to having time to clear your mind, be quiet, or daydream.

无聊已经成为一种趋势。研究指出无聊有益于创造力和创新，也有益于心理健康。研究发现，人们在完成一项乏味的任务后会更有创造力。当人们感到无聊时，他们的“联想思维”会增加——这是在不同想法之间建立新联系的过程，与创新思维相关。这些研究令人印象深刻，但实际上，无聊的好处可能与有时间理清思绪、保持安静或做白日梦有关。

P2 In our stimulation-rich world, it seems unrealistic that boredom could occur at all. Yet, there are valid reasons boredom may feel so painful. As it turns out, boredom might signal the fact that you have a need that isn't being met.

在我们这个刺激丰富的世界里，无聊似乎根本不可能发生。然而，无聊让人感觉如此痛苦是有正当理由的。事实证明，无聊可能预示着你有某种需求没有得到满足。

P3 Our always-on world of social media may result in more connections, but they are superficial and can get in the way of building a real sense of belonging. Feeling bored may signal the desire for a greater sense of community and the feeling that you fit in with others around you. So take the step of

joining an organization to build face-to-face relationships. You'll find depth that you won't get from your screen no matter how many likes you get on your post.

我们这个永远在线的社交媒体世界可能会带来更多联系,但这些联系是肤浅的,可能会妨碍建立真正的归属感。感到无聊可能预示着渴望获得更强的社群意识以及你与周围他人契合的感觉。因此,迈出加入一个组织的步伐,建立面对面的关系。你会发现深度,这是你无论在帖子上获得多少点赞都无法从屏幕上得到的。

P4 Similar to the need for belonging, bored people often report that they feel a limited sense of meaning. It's a fundamental human need to have a larger purpose and to feel like we're part of something bigger than ourselves. When people are bored, they're more likely to feel less meaning in their lives. If you want to reduce boredom and increase your sense of meaning, seek work where you can make a unique contribution, or find a cause you can support with your time and talent.

与归属需求类似,感到无聊的人常常报告说他们感到意义感有限。拥有更宏大的目标并感觉自己是比自身更伟大事物的一部分,是人类的基本需求。当人们感到无聊时,他们更有可能觉得自己的生活缺乏意义。如果你想减少无聊并增强意义感,寻找你可以做出独特贡献的工作,或者找到一项你可以用时间和才能支持的事业。

P5 If your definition of boredom is being quiet, mindful, and reflective, keep it up. But if you're struggling with real boredom and the emptiness it provokes, consider whether you might seek new connections and more significant challenges. These are the things that will genuinely relieve boredom and make you more effective in the process.

如果你对无聊的定义是安静、专注和反思,那就继续保持。但如果你正在与真正的无聊及其引发的空虚感作斗争,考虑一下你是否可以寻求新的联系和更有意义的挑战。这些才是真正能够缓解无聊并让你在此过程中变得更加高效的事情。

题目与逐题解析

46. What have studies found about boredom?

- A) It facilitates innovative thinking.
- B) It is a result of doing boring tasks.
- C) It helps people connect with others.
- D) It does harm to one's mental health.

研究发现了关于无聊的什么情况?

- A) 它促进创新思维。
- B) 它是做无聊任务的结果。
- C) 它帮助人们与他人建立联系。
- D) 它对人的心理健康有害。

【答案】 A (细节题)

【判型】 题干 What have studies found about boredom? 直接问研究的客观发现, 未出现 infer/imply/mainly about 等推断或主旨信号

【拆句】 现在完成时一般疑问句 What have studies found about boredom?, 主干是 studies have found what about boredom; about boredom 是 found 的范围状语, 结构平铺直叙, 无陷阱

【定位】 Studies point to how boredom is good for creativity and innovation, as well as mental health.
研究指出无聊有益于创造力和创新（思维），也有益于心理健康。

【选项】 A) ✓ 正确

boredom is good for creativity and innovation ↔ **It facilitates innovative thinking.**

预判的「无聊带来好处+创新」两要素在 It facilitates innovative thinking. 中都被精确还原——facilitates 对应 is good for, innovative thinking 对应 creativity and innovation

B) 与原文相反

原文说 people are more creative following the completion of a tedious task——是完成无聊任务之后人更有创造力，并非无聊本身是做无聊任务的结果；It is a result of doing boring tasks. 把因果方向倒过来，是典型的与原文相反

C) 无中生有

P1 谈的是无聊与创造力、创新、心理健康的关系，未提及无聊「帮人和他人连接」；It helps people connect with others. 的内容在 P1 中没有任何对应句

D) 与原文相反

原文明确说无聊 as well as mental health（与心理健康并列在 good for 之后，意为对心理健康有益），It does harm to one's mental health. 说的是「有害」——评价极性完全反转

47. What does the author say boredom might indicate?

- A) A need to be left alone.
- B) A desire to be fulfilled.
- C) A conflict to be resolved.
- D) A feeling to be validated.

作者说无聊可能表明什么？

A) 需要独处。 B) 渴望得到满足。 C) 需要解决的冲突。 D) 需要被认可的感受。

【答案】 B（细节题）

【判型】 题干 What does the author say boredom might indicate? 是对作者陈述的直接发问，无推断或主旨信号

【拆句】 宾语从句 What does the author say boredom might indicate?, 主句 the author say + 宾语从句 boredom might indicate what; what 是宾语从句里 indicate 的宾语前移；结构常见，无陷阱

【定位】 As it turns out, boredom might signal the fact that you have a need that isn't being met.
事实证明，无聊可能是在告诉你：你有一种需求没有被满足。

【选项】 A) 无中生有

原文未提「希望独处」；A need to be left alone. 是把后文 P3 关于「真实连接」的话题反向推断出来的伪命题，但 P2 中根本没有这层意思

B) ✓ 正确

a need that isn't being met ↔ A desire to be fulfilled.

预判的「需求+未被满足」两要素被 A desire to be fulfilled. 完整保留——desire 替换 need, to be fulfilled 替换被动定语从句

C) 偷换概念

A conflict to be resolved. 谈「冲突」，但 P2 全段未提任何 conflict (冲突) 的概念——need 是「需求」不是「冲突」，两者不能等同

D) 偷换概念

A feeling to be validated. 说「需要被确认的感觉」，但原文说的是「需求未被满足」——「确认感觉」与「满足需求」不是一回事；validate 与 meet 不能等价替换

48. What do we learn about social media from the passage?

- A) It may be an obstacle to expanding one's connections.
- B) It may get in the way of enhancing one's social status.
- C) It may prevent people from developing a genuine sense of community.
- D) It may make people feel that they ought to fit in with the outside world.

从文章中我们了解到关于社交媒体的什么情况？

- A) 它可能是拓展人际关系的障碍。 B) 它可能妨碍提升社会地位。
- C) 它可能阻碍人们培养真正的社群归属感。 D) 它可能使人们觉得自己应该融入外部世界。

【答案】 C (细节题)

【判型】 题干 What do we learn about social media from the passage? 问文章告诉我们关于 social media 的什么事实，无推断或主旨信号

【拆句】 一般疑问句 What do we learn about social media from the passage?, 主干 we learn what about social media; from the passage 是状语，提示答案在文章里有明文，结构无陷阱

【定位】 Our always-on world of social media may result in more connections, but they are superficial and can get in the way of building a real sense of belonging.

我们这个永远在线的社交媒体世界可能带来更多连接，但这些连接是肤浅的，会妨碍建立真正的归属感。

【选项】 A) 与原文相反

原文 may result in more connections 说的是社交媒体带来更多连接（在数量上扩大），而 It may be an obstacle to expanding one's connections. 说它「妨碍扩大连接」——评价方向反转

B) 偷换概念

原文未提 social status（社会地位）；It may get in the way of enhancing one's social status. 中「妨碍提升社会地位」在 P3 中无任何对应——social 一词共用但 status 完全没出现

C) ✓ 正确

can get in the way of building a real sense of belonging ↔

It may prevent people from developing a genuine sense of community.

预判的「妨碍」+「真正的归属感」两要素被 prevent people from developing a genuine sense of community 完整对应——动词短语、形容词、核心名词全部同步同义替换

D) 偷换概念

It may make people feel that they ought to fit in with the outside world. 说「让人觉得自己必须融入外部世界」，但原文 the feeling that you fit in with others around you 把 fit in 作为「归属感」的一部分（是好事），不是说社交媒体让人觉得「必须迎合」

49. What does the author suggest people do to get rid of boredom?

- A) Count the likes they get on their posts.
- B) Reflect on how they relate to others.
- C) Engage in real-life interactions.
- D) Participate in online discussions.

作者建议人们做什么来摆脱无聊？

- A) 计算他们的帖子获得的点赞数。
- B) 反思他们与他人的关系。
- C) 参与现实生活中的互动。
- D) 参加在线讨论。

【答案】 C（细节题）

【判型】 题干 What does the author suggest people do to get rid of boredom? 问作者明文给出的建议，无推断信号

【拆句】 宾语从句 + 不定式状语 What does the author suggest people do to get rid of boredom?, 主句 the author suggest + 宾语 people do what; to get rid of boredom 是目的状语；结构稍复杂但无陷阱

【定位】 So take the step of joining an organization to build face-to-face relationships. You'll find depth that you won't get from your screen no matter how many likes you get on your post. 所以请采取行动，加入一个组织，去建立面对面的关系。你会从中获得屏幕给不了的深度——无论你的帖子收到多少点赞。

【选项】 A) 与原文相反

原文 no matter how many likes you get on your post 明确否定「数点赞」的价值；
Count the likes they get on their posts. 反而把「数点赞」当作建议——完全反向

B) 答非所问

Reflect on how they relate to others. 说「反思自己如何与他人相处」，但作者的建议是「采取行动加入组织」，不是「反思」；reflect 与 take action 是两种完全不同的应对方式

C) ✓ 正确

build face-to-face relationships ↔ Engage in real-life interactions.

预判的「面对面/线下」+「关系/互动」两要素被 Engage in real-life interactions. 整体保留，且未做任何延伸

D) 与原文相反

Participate in online discussions. 说「参与线上讨论」——而原文恰恰让人远离屏幕，转向 build face-to-face relationships；线上与线下方向反转

50. What should people do to enhance their sense of meaning?

- A) Try to do something original.
- B) Confront significant challenges.
- C) Define boredom in their unique way.
- D) Devote themselves to a worthy cause.

人们应该做什么来增强意义感？

- A) 尝试做一些原创的事情。
- B) 面对重大挑战。
- C) 以独特的方式定义无聊。
- D) 致力于有价值的事业。

【答案】 D (细节题)

【判型】 题干 What should people do to enhance their sense of meaning? 直接问该做什么，无推断信号

【拆句】 情态动词疑问句 + 不定式状语 What should people do to enhance their sense of meaning?, 主干 people should do what; to enhance... 是目的状语；结构清晰，无陷阱

【定位】 If you want to reduce boredom and increase your sense of meaning, seek work where you can make a unique contribution, or find a cause you can support with your time and talent.

如果你想减少无聊、增强意义感，就去寻找一份你能做出独特贡献的工作，或者找到一项你能用时间和才华去支持的事业。

【选项】 A) 偷换概念

Try to do something original. 说「做原创的事」，但原文 make a unique contribution 强调的是「做独特贡献」——unique contribution（独特贡献）与 something original（原创之物）不是同一概念，前者强调贡献的「不可替代性」，后者强调内容的「首创性」

B) 张冠李戴

Confront significant challenges. 说「直面重大挑战」，但 P4 通篇未提 challenge（挑战）；该词只在 more significant challenges 出现，是 P5 谈「摆脱无聊」的总建议，不是 P4 谈「增强意义感」的具体做法

C) 答非所问

Define boredom in their unique way. 说「用自己独特的方式定义无聊」——这与题目所问的「增强意义感」无关；该项把 If your definition of boredom is being quiet, mindful, and reflective 中的 definition 一词嫁接到本题

D) ✓ 正确

find a cause you can support with your time and talent ↔

Devote themselves to a worthy cause.

原文给的两个建议中，选项命中第二个 find a cause you can support with your time and talent——Devote themselves to a worthy cause. 是它的精准凝练

SENTENCE INSIGHTS • 句子精讲

7 句真题句逐层精讲

下列真题句各有独立的句子解析页——中文翻译、结构树逐层拆解、成分与时态、考点讲解与真题高频词。点击句子进入完整解析。

Yet, there are valid reasons boredom may feel so painful.

第2段，第2句

there be 句型和定语从句都是四六级、考研阅读中的高频结构。本句的定语从句省略关系词这一特征也较为常见，具有一定代表性。掌握本句结构有助于学生识别类似的 there be 加定语从句句式，迁移价值较高。

As it turns out, boredom might signal the fact that you have a need that isn't being met.

第2段，第3句

本句结构高度典型:主句带同位语从句解释抽象名词、同位语从句内嵌套定语从句、情态动词表推测、被动进行时描述状态，均为四六级和考研阅读中的高频句式；掌握本句的分析方法后，可直接迁移到大量类似结构的长难句中，复用价值高。

You'll find depth that you won't get from your screen no matter how many likes you get on your post.

第3段，第4句

定语从句 + 状语从句嵌套是四六级和考研阅读的高频句式。that 引导限制性定语从句修饰宾语、no matter how 引导让步状语从句表让步转折,都是考试常见结构。这种主句带修饰性从句、从句内再嵌套状语从句的三层句式,在真题长难句中反复出现,学习后迁移价值高

If you want to reduce boredom and increase your sense of meaning, seek work where you can make a unique contribution, or find a cause you can support with your time and talent.

第4段，第4句

成分种类较为丰富且包含典型易错点。覆盖主语、谓语、宾语、状语、定语从句等多种成分;包含并列谓语、关系副词 where 作状语、省略关系代词的定语从句等考点;祈使句的主语省略和不定式宾语也值得训练。这些特征使本句成为较好的成分划分练习材料。

What does the author suggest people do to get rid of boredom?

第49题 题干

"疑问词 + 助动词 + 主语 + 谓语 + 内容部分"是阅读和考试中很常见的问句结构，"suggest"后接具体内容也很有代表性。掌握这种拆法后，迁移到同类提问句非常有帮助。

Reflect on how they relate to others.

第49题，B

祈使句加疑问词引导的宾语从句是常见句式，在考试阅读和写作中频繁出现。特别是"动词 + 介词 + how/what/when 等引导的从句"这一结构，在四六级和考研真题中属于高频典型句式，掌握后可应用于多种语境。

Devote themselves to a worthy cause.

第50题，D

祈使句是四六级和考研阅读中常见的句式，尤其在号召性、建议性文段中频繁出现。本句的"动词原形 + 反身代词宾语 + 介词短语状语"结构，以及"devote oneself to"固定搭配，都是高频考点。掌握本句结构后，可迁移到大量类似祈使句和固定搭配句式。

Part III Section C (2)

Directions: There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

Passage Two

Questions 51 to 55 are based on the following passage.

P1 Can you remember what you ate yesterday? If asked, most people will be able to give a vague description of their main meals: breakfast, lunch, dinner. But can you be sure you've noted every snack bar in your car, or every handful of nuts at your desk? Most people will have a feeling that they've missed something out.

你能记得自己昨天吃了什么吗？如果被问到，大多数人能够给出对其主餐的模糊描述：早餐、午餐、晚餐。但你能确定自己记下了车里的每一根零食棒，或者办公桌前的每一把坚果吗？大多数人会觉得自己遗漏了一些东西。

P2 We originally had this suspicion back in 2016, puzzled by the fact that national statistics showed calorie consumption falling dramatically over past decades. We found reliable evidence that people were drastically under-reporting what they ate.

我们最初在2016年就有了这种怀疑，当时对国家统计局数据显示过去几十年卡路里消耗量急剧下降这一事实感到困惑。我们发现可靠证据表明，人们对自己的饮食存在严重的少报现象。

P3 Now the Office for National Statistics has confirmed that we are consuming 50% more calories than our national statistics claim.

现在，国家统计局已经证实，我们摄入的卡路里比国家统计数据声称的多50%。

P4 Why is this happening? We can point to at least three potential causes. One is the rise in obesity levels itself. Under-reporting rates are much higher for obese people, because they simply

consume more food, and thus have more to remember.

为什么会发生这种情况？我们至少可以指出三个潜在原因。一个是肥胖水平本身的上升。肥胖人群的少报率要高得多，因为他们摄入的食物更多，因此需要记住的也更多。

P5 Another cause is that the proportion of people who are trying to lose weight has been increasing over time. People who want to lose weight are more likely to under-report their eating—regardless of whether they are overweight or not. This may be driven partly by self-deception or "wishful thinking".

另一个原因是试图减肥的人群比例随着时间推移一直在增加。想要减肥的人更有可能少报自己的饮食——无论他们是否超重。这可能部分是由自我欺骗或“一厢情愿的想法”驱动的。

P6 The final potential cause is an increase in snacking and eating out over recent decades—both in terms of how often they happen and how much they contribute to our overall energy intake. Again, there is evidence that food consumed out of the home is one of the most poorly recorded categories in surveys.

最后一个潜在原因是近几十年来吃零食和外出就餐的增加——无论是在发生频率方面还是在对我们总体能量摄入的贡献方面。同样，有证据表明，在家以外消费的食物是调查中记录最不准确的类别之一。

P7 So, what's the message conveyed? For statistics, we should invest in more accurate measurement options. For policy, we need to focus on options that make it easy for people to eat fewer calories. If people do not know how much they are eating, it can be really hard for them to stick to a diet. Also, we should be looking for new ways to ensure what people eat wouldn't have much impact on their waistlines. If this works, it won't matter if they can't remember what they ate yesterday.

那么，传达的信息是什么？在统计方面，我们应该投资于更准确的测量方法。在政策方面，我们需要关注让人们更容易摄入更少卡路里的选项。如果人们不知道自己吃了多少，他们可能真的很难坚持节食。此外，我们应该寻找新方法来确保人们吃的东西不会对他们的腰围产生太大影响。如果这奏效，他们能否记得昨天吃了什么就不重要了。

题目与逐题解析

51. What did the author suspect back in 2016?

- A) Calorie consumption had fallen drastically over the decades.
- B) Most people surveyed were reluctant to reveal what they ate.
- C) The national statistics did not reflect the actual calorie consumption.
- D) Most people did not include snacks when reporting their calorie intake.

作者在2016年怀疑什么？

- A) 几十年来卡路里摄入量已经大幅下降。
- B) 大多数受访者不愿透露他们吃了什么。
- C) 国家统计数据没有反映实际的卡路里摄入量。
- D) 大多数人在报告卡路里摄入量时没有包括零食。

【答案】 C (细节题)

【判型】 What did the author suspect back in 2016 问的是一个具体过去时间点上的具体事实，没有 infer/imply 之类信号词，属于事实细节题。

【拆句】 题干 What did the author suspect back in 2016? 是一个简单的特殊疑问句，主语 the author，谓语 suspect，宾语用 what 提问，back in 2016 是时间状语，结构平铺直叙，无陷阱。

【定位】 We originally had this suspicion back in 2016, puzzled by the fact that national statistics showed calorie consumption falling dramatically over past decades.

我们最初是在 2016 年产生这种怀疑的——我们困惑于一个事实：国家统计数据显示，过去几十年里热量消费在大幅下降。

【选项】 A) 与原文相反

Calorie consumption had fallen drastically over the decades. 复述的是统计数据本身的表象，作者恰恰是怀疑这个表象不可信，而非相信它。

B) 无中生有

原文只说人们 drastically under-reporting——漏报，没有任何文字表明他们 reluctant to reveal——主观上不愿透露；后文第 5 段更解释为自我欺骗或愿景式思维，而非拒绝回答。

C) ✓ 正确

national statistics showed calorie consumption falling dramatically over past decades ↔

The national statistics did not reflect the actual calorie consumption.

预判落点是“统计与现实不符”，四个选项里只有 The national statistics did not reflect the actual calorie consumption. 直接说统计没有反映真实情况，与预判完全吻合。

D) 张冠李戴

Most people did not include snacks when reporting their calorie intake. 接近第 1 段 every snack bar in your car 和第 6 段 snacking 的内容，但那些不是 2016 年的怀疑，而是后续展开的具体机制。

52. What has the Office for National Statistics verified?

- A) People's calorie intake was far from accurately reported.
- B) The missing out of main meals leads to the habit of snacking.
- C) The nation's obesity level has much to do with calorie intake.
- D) Calorie consumption is linked to the amount of snacks one eats.

国家统计局证实了什么？

- A) 人们的卡路里摄入量远未被准确报告。 B) 遗漏正餐导致了吃零食的习惯。
- C) 国家的肥胖水平与卡路里摄入量有很大关系。 D) 卡路里摄入量与一个人吃零食的量有关。

【答案】 A (细节题)

【判型】 What has the Office for National Statistics verified? 直问某机构核实了什么事，无推断信号词，属事实细节题。

【拆句】 题干 What has the Office for National Statistics verified? 是现在完成时的特殊疑问句，主语是机构名，谓语 verified，结构清晰，无障碍。

【定位】 Now the Office for National Statistics has confirmed that we are consuming 50% more calories than our national statistics claim.

如今国家统计局已证实：我们实际摄入的热量比国家统计声称的高出 50%。

【选项】 A) ✓ 正确

we are consuming 50% more calories than our national statistics claim ↔

People's calorie intake was far from accurately reported.

People's calorie intake was far from accurately reported. 把“实际比上报高出 50%”这件事精确概括为“摄入量远未被准确上报”，与预判——对应。

B) 无中生有

The missing out of main meals leads to the habit of snacking. 把“漏掉正餐”和“养成吃零食的习惯”绑成因果，原文从未提及这种因果链——文中说的是“忘记零食”而非“漏掉正餐导致吃零食”。

C) 张冠李戴

The nation's obesity level has much to do with calorie intake. 涉及肥胖与热量摄入的关系，那是第 4 段 rise in obesity levels 后面的讨论，不是国家统计局证实的内容。

D) 张冠李戴

Calorie consumption is linked to the amount of snacks one eats. 类似第 6 段对零食的讨论，但那是作者推论的“潜在原因之一”，不是国家统计局已证实的事实。

53. What do we learn about obese people from the passage?

- A) They usually keep their eating habits a secret.
- B) They overlook the potential causes of obesity.
- C) They cannot help eating more than they should.
- D) They have difficulty recalling what they have eaten.

从文章中我们对肥胖者了解到什么？

- A) 他们通常对自己的饮食习惯保密。 B) 他们忽视了肥胖的潜在原因。
- C) 他们情不自禁地吃得比应该吃的多。 D) 他们难以回忆起自己吃过什么。

【答案】 D (细节题)

【判型】 What do we learn about obese people from the passage? 限定主体为某类人，问关于他们的文本陈述，仍是文中明示的细节而非推断。

【拆句】 题干 What do we learn about obese people from the passage? 是 What 引导的疑问句，about obese people 限定 learn 的对象，from the passage 是出处状语，句意直白。

【定位】 Under-reporting rates are much higher for obese people, because they simply consume more food, and thus have more to remember.

肥胖人群的漏报率要高得多，因为他们吃得本来就多，需要回想的食物也就更多。

【选项】 A) 偷换概念

They usually keep their eating habits a secret. 把客观上的漏报误读成主观上对外保密，原文没有任何表示故意隐瞒的字眼。

B) 张冠李戴

They overlook the potential causes of obesity. 把“忽视肥胖原因”安到肥胖人群头上，但全文中“指出潜在原因”的是作者（We can point to at least three potential causes），与肥胖人群无关。

C) 过度推断

They cannot help eating more than they should. 加入了 cannot help（情不自禁）和 more than they should（超出应吃的量）两个主观限制，原文只是说 simply consume more food——“就是吃得有些”，并未涉及自控力或应有量。

D) ✓ 正确

they simply consume more food, and thus have more to remember ↔

They have difficulty recalling what they have eaten.

预判落在“记不清吃了什么”，四个选项中只有 They have difficulty recalling what they have eaten. 直接说回忆困难，与预判完美对应。

54. What often goes unnoticed in surveys on food consumption?

- A) The growing trend of eating out.
- B) The potential causes of snacking.
- C) People's home energy consumption.
- D) People's changing diet over the years.

在食物消费调查中什么常常被忽视？

- A) 外出就餐的增长趋势。 B) 吃零食的潜在原因。 C) 人们的家庭能源消耗。
- D) 人们多年来不断变化的饮食。

【答案】 A （细节题）

【判型】 What often goes unnoticed in surveys on food consumption? 问的是调查中常被漏掉的某个具体类别，属于事实细节而非推断。

【拆句】 题干 What often goes unnoticed in surveys on food consumption? 主语 what, goes unnoticed 是系表结构（go + 形容词，表“处于...状态”），in surveys on food consumption 是地点状语限定情境，结构无陷阱，关键要识别 go unnoticed 的固定搭配含义。

【定位】 Again, there is evidence that food consumed out of the home is one of the most poorly recorded categories in surveys.

再者，有证据表明：在家以外吃的东西，是调查中被记得最差的类别之一。

【选项】 A) ✓ 正确

food consumed out of the home ↔ **The growing trend of eating out.**

an increase in snacking and eating out over recent decades ↔

The growing trend of eating out.

段末明确说在家外吃饭是漏报最严重的类别之一，只有 The growing trend of eating out. 把“外出就餐”作为答案给出，与定位句完全对应。

B) 答非所问

题干问“调查中常被漏掉的是什么”，The potential causes of snacking. 谈的是“吃零食的潜在原因”，方向跑偏；且原文也没说零食的“原因”被漏报。

C) 偷换概念

People's home energy consumption. 字面上像“家庭能源消费”，与“在家吃饭”完全是两个领域；原文谈的是 energy intake（能量摄入），不是 energy consumption（能源消费）。

D) 以偏概全

People's changing diet over the years. 用“饮食习惯随年份变化”这种大词把整篇主旨偷换上来，原文段落讲的是某一类食物在调查中被漏报，不是泛泛“饮食变化”。

55. What does the author suggest policymakers do about obesity?

- A) Remind people to cut down on snacking.
- B) Make sure people eat non-fattening food.
- C) Ensure people don't miss their main meals.
- D) See that people don't stick to the same diet.

作者建议政策制定者就肥胖问题采取什么措施？

- A) 提醒人们减少吃零食。
- B) 确保人们吃不增肥的食物。
- C) 确保人们不会错过正餐。
- D) 确保人们不坚持同样的饮食。

【答案】 B（细节题）

【判型】 What does the author suggest policymakers do about obesity? 问作者对决策者的具体建议，文中尾段已明示，属细节题而非主旨题。

【拆句】 题干 What does the author suggest policymakers do about obesity? 是 What 引导的疑问句，谓语 suggest 后接的是省略 that 的宾语从句 policymakers do ...，从句动词用原形 do (suggest 类动词的虚拟语气)，about obesity 限定建议主题。

【定位】 Also, we should be looking for new ways to ensure what people eat wouldn't have much impact on their waistlines.

此外，我们应当寻找新方法，确保人们吃下去的东西不会对腰围产生多大影响。

【选项】 A) 无中生有

Remind people to cut down on snacking. 让人们少吃零食，仅来自 snacking and eating out 的现象描述，文中并未在 P7 提出“提醒减少零食”这一具体政策建议。

B) ✓ 正确

what people eat wouldn't have much impact on their waistlines ↔

Make sure people eat non-fattening food.

Make sure people eat non-fattening food. 把“吃了不会胖到腰围”换说成“吃不发胖的食物”，是从定位句的反向角度切入同一件事——与预判正对。

C) 与原文相反

Ensure people don't miss their main meals. 让人们别漏掉正餐，与全文主旨方向相反——文章说人们漏报、吃得多，不是吃得少，更不存在“应该多吃几顿正餐”的建议。

D) 偷换概念

See that people don't stick to the same diet. 让人们不要长期保持同一种饮食，原文从未提及对单一饮食的看法；唯一相关的 stick to a diet 谈的是减肥者难以坚持节食，与让大众放弃单一饮食毫无关系。

SENTENCE INSIGHTS • 句子精讲

5 句真题句逐层精讲

下列真题句各有独立的句子解析页——中文翻译、结构树逐层拆解、成分与时态、考点讲解与真题高频词。点击句子进入完整解析。

If asked, most people will be able to give a vague description of their main meals: breakfast, lunch, dinner.

第1段，第2句

条件状语从句位于句首、带主语和 be 动词省略的结构，在四六级和考研阅读中较为常见。主句的“情态意义结构 + 及物动词 + 宾语”以及冒号引出同位语的用法，也是典型的书面语句式。掌握本句结构后，可迁移至大量类似的条件句和列举说明句型。

Under-reporting rates are much higher for obese people, because they simply consume more food, and thus have more to remember.

第4段，第4句

主句 + 原因状语从句（because 引导）是考试中高频出现的因果逻辑句式，从句内部的并列谓语也是常见结构。整体句式具有较好的代表性，学生掌握后可迁移到大量类似句子。

People's calorie intake was far from accurately reported.

第52题，A

被动语态是四六级和考研阅读中的高频结构，且状语插入谓语中间的用法也较为常见，本句展示的"be + 过去分词"句式具有较好的代表性，掌握后可迁移应用，但整体结构偏简单，缺少从句等更复杂的典型考点

They cannot help eating more than they should.

第53题，C

"cannot help doing" 固定搭配和 "more than" 比较结构都是四六级和考研常见句式，具有较高的迁移性。从句中的谓语省略也是比较结构的典型特征，掌握后可应用于大量类似句型。

Remind people to cut down on snacking.

第55题，A

祈使句在四六级、考研阅读和写作中较为常见，尤其是表达建议、要求、指令的场景。动词加宾语加不定式补语的结构也是高频句型，学习后可在多种语境中复用。

2021年6月·第3套英语四级汉译英（段落翻译）·中国名茶·龙井的客观介绍 参考译文与解析

PASSAGE & TRANSLATION • 题和解析

汉译英真题、参考译文与逐句解析

本页整篇参考英译与逐句解析由懒笔记基于2021年6月·第3套 英语四级汉译英（段落翻译）原卷题干译审整理。与试卷排版同一卷面：Directions 与一整段中文原文连续排印——整段连排、无段落标记无题号，把它切成一句句翻译单元本身就是解题动作。卷面之后先给整篇参考英译定稿，再按自切句序逐句拆分：定英文主干、降级修饰成分、逐项落实语法点、句内定稿英译，答案直显。

真题卷第3套(2021-06) • 四级

Part IV

Directions:For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

龙井(Longjing)是一种绿茶，主要产自中国东部沿海的浙江省。龙井茶独特的香味和口感为其赢得了"中国名茶"的称号，在中国深受大众的欢迎，在海外饮用的人也越来越多。龙井茶通常手工制作，其价格可能极其昂贵，也可能比较便宜，这取决于茶的生长地、采摘时间和制作工艺。龙井茶富含维生素C和其他多种有益健康的元素。经常喝龙井茶有助于减轻疲劳、延缓衰老。

参考译文

整篇参考英译是复盘资产，考卷上只印中文原文——四六级 Part IV 翻译按整篇「表达通顺连贯、用词准确、语法正确」四档评分。

Longjing is a kind of green tea produced mainly in Zhejiang Province on the eastern coast of China. Its unique aroma and taste have earned Longjing the title of "China Famous Tea", and it is very popular among the public in China, with an increasing number of people drinking it abroad as well. Longjing tea is usually made by hand, and its price can be extremely high or relatively low, depending on where it grows, when it is picked, and how it is made. In addition, Longjing tea is rich in vitamin C and various other elements beneficial to health. Drinking it regularly helps relieve fatigue and delay aging.

【衔接】句1→句2：用 its 代上文 Longjing

第二句若再以 Longjing tea 开头，会与第一句的 Longjing 重复笨重。处理办法：第二句直接以代词性物主限定词 its 起头（Its unique aroma and taste...），承接第一句主语。这是英文避免重复的常用承接手段，对应中文 龙井茶独特的香味和口感 中省略反复出现的主语。

句2→句3：保持主语连贯性

第三句 龙井茶通常手工制作 中文重提主语「龙井茶」，英文这里可以重提 Longjing tea 以重启新话题段（从声誉转到制作工艺与价格），不必硬替换成 it——重提一次反而清晰，让读者明确这是新的一个介绍维度。

句3→句4：转换话题用 In addition / Moreover

第四句 龙井茶富含维生素C和其他多种有益健康的元素 从「制作工艺与价格」切换到「营养与健康」，英文最好补一个递进/添加类关联词显出逻辑层次：In addition, Longjing tea is rich in... 或 Moreover, ...。不补虽语义可通，但整篇读起来层次更跳。

句4→句5：用 Regular consumption 显因果递进

第五句 经常喝龙井茶有助于减轻疲劳、延缓衰老 与第四句富含营养是因果递进，可在句首点出衔接：直接用 Drinking it regularly... 让 it 回指 Longjing tea，避免又一次写出 Longjing tea；或用 Regular consumption of this tea... 更书面。

逐句解析

一整段连排中文、无段落标记无题号——把它切成一句句翻译单元本身就是解题动作，句前 N. 为逐句解析自切的句序号（非考卷题号），与卷面中文逐字对应。

【主旨】中国名茶·龙井的客观介绍

本段是典型的中国文化/物产介绍类说明文：开篇即以 龙井(Longjing)是一种绿茶，主要产自中国东部沿海的浙江省。给出「是什么、产自哪」的客观定义，随后逐一介绍它的声誉、价格、营养与功效，全篇是对一个仍在被饮用的事物作客观陈述，无任何叙事或回忆。这一定调直接决定下面三件事：主时态走一般现在时；用词偏中性正式、不带感情色彩；译「龙井」这种文化负载词时优先沿用约定俗成的官方译名 Longjing。

【时态】一般现在时

全篇都是对龙井茶「是什么、怎么样、有什么功效」的客观、当下成立的陈述——主要产自中国东部沿海的浙江省、在中国深受大众的欢迎、龙井茶富含维生素C和其他多种有益健康的元素 讲的都是现在仍然成立的客观事实，没有任何明确的过去时间标志，因此整段以「一般现在时」为基调。仅句2末尾 在海外饮用的人也越来越多 含「越来越...」这种持续变化语义，可在该处局部叠加现在进行时显出趋势，但整段框架仍是一般现在时。

【译法】龙井

原文 龙井(Longjing) 已用括号给出官方拼音译名 Longjing, 属约定俗成译法, 全篇统一译作 Longjing; 首次出现可写成 Longjing tea 以显类别, 之后再次出现统一用 Longjing tea, 不得忽而 Dragon Well、忽而 Long Jing。

绿茶

绿茶 是茶叶分类的固定英文译法 green tea, 全篇统一小写不大写、不加冠词作泛指, 避免写成 the green tea 或 Green-tea。

浙江省

浙江省 取官方约定译名 Zhejiang Province, 全篇统一使用, 首字母大写; 不要写成 ZheJiang 或 Zhe Jiang Province。

中国名茶

中国名茶 是带引号的称号, 统一译作 China Famous Tea (保留引号以示称号), 或退而求其次译作 one of China's famous teas; 全篇仅此一处出现, 确保对应回原文的引号称号即可。

维生素C

维生素C 用国际通用写法 vitamin C, C 大写、与 vitamin 之间留一个空格, 不写成 VC 或 vitamin-c。

1. 龙井(Longjing)是一种绿茶, 主要产自中国东部沿海的浙江省。

【主干】Longjing—is—a kind of green tea (主语策略: 原句主语)

中文已经给出明确主语 龙井(Longjing), 直接取作英文主语 Longjing; 核心动词是判断动词「是」, 对应英文系动词 is; 表语是「一种绿茶」对应 a kind of green tea / a variety of green tea。后半句「主要产自...浙江省」是对主语的进一步说明, 不另立主干, 留给降级修饰处理。所以整句英文骨架就是 Longjing is a kind of green tea。

【降级】后置分词短语 produced mainly in... 作定语

主要产自中国东部沿海的浙江省 是对「绿茶」的进一步说明, 中文里它是第二个动词性短语「产自...」。按英文形合习惯, 不能照中文写成 Longjing is a kind of green tea and is mainly produced in... (流水句), 而是把它降级成过去分词短语 produced mainly in Zhejiang Province on the eastern coast of China, 作后置定语修饰 green tea。「中国东部沿海」是地点的进一步修饰, 用介词短语 on the eastern coast of China 后置。

【语法】时态

回指全篇基调 龙井(Longjing)是一种绿茶 讲的是当下成立的客观事实，用一般现在时，系动词取 is，分词 produced 不带时态、自动跟随主句。

主谓一致

主语 Longjing 是单数（不可数物名，作单数处理），系动词必须用 is 而非 are；produced 作分词不变形。

冠词

Longjing 作专名零冠词，不能写成 The Longjing；green tea 作泛指类别名词零冠词，写 a kind of green tea，不要写 a kind of a green tea。

介词搭配

「产自」用 produced in（产地）；「东部沿海」对应 on the eastern coast of China，「沿海」用 on the coast（介词 on）而不是 in the coast。

【译文】 Longjing is a kind of green tea produced mainly in Zhejiang Province on the eastern coast of China.

2. 龙井茶独特的香味和口感为其赢得了"中国名茶"的称号，在中国深受大众的欢迎,在海外饮用的人也越来越多。

【主干】 Its unique aroma and taste—have earned/earn—Longjing the title（主语策略：原句主语）

中文逗号串了三件事，但首段「独特的香味和口感为其赢得了『中国名茶』的称号」语义最完整，取作主干。主语用 龙井茶独特的香味和口感→Its unique aroma and taste（用 its 回指上句的 Longjing，避免重复）；谓语用「赢得」→earn，双宾语结构 earn sb. sth.：宾语1 = Longjing（茶本身），宾语2 = the title of 『China Famous Tea』。后两个分句「在中国深受欢迎」「海外饮用的人越来越多」信息独立，作为后续并列主干分别处理，不全塞进一句。

【降级】 三层并列：主干 + and is... + with...drinking it abroad

在中国深受大众的欢迎 视角转回茶本身，用 and it is very popular... in China 作并列分句；在海外饮用的人也越来越多 是「越来越多」的趋势，改写成 with an increasing number of people drinking it abroad 作伴随状语，or while a growing number of people overseas are drinking it。这样整句结构为：主干（earn 双宾语）+ and 并列分句（popular in China）+ with 伴随状语（drinking abroad），既覆盖全部信息，又避免三个 and 一字排开的流水句。

【语法】时态

回指全篇基调，整句采用一般现在时——「赢得称号」是已经成立、至今仍然成立的事实，用一般现在时 earn 即可；若想强调「已经赢得并保有」的完成意味，也可用 have earned。结尾 越来越多 表持续变化趋势，用现在进行时 are drinking 或形容词 a growing number of 显出「渐多」，不要用过去时。

主谓一致

主语 aroma and taste 是复合主语，谓语用复数 earn / have earned，不要写 earns / has earned；后半 it is popular 主语换成代词 it（指 Longjing tea，作单数），动词用 is。

单复数

「饮用的人也越来越多」中「人」是可数复数→an increasing number of people / a growing number of people overseas, people 本身就是复数，不要再加 s 写成 peoples。

冠词与引号

the title of 『China Famous Tea』用 the（特指这一称号），称号本身保留双引号以呼应中文“中国名茶”。

介词搭配

「在中国」用 in China；「在海外」用 abroad（副词）或 overseas（可作副词），不要写成 in abroad；「赢得 X 称号」用 earn sb. the title of Y 或 win sb. the title of Y。

【译文】 Its unique aroma and taste have earned Longjing the title of "China Famous Tea", and it is very popular among the public in China, with an increasing number of people drinking it abroad as well.

3. 龙井茶通常手工制作，其价格可能极其昂贵，也可能比较便宜，这取决于茶的生长地、采摘时间和制作工艺。

【主干】 Longjing tea—is—usually made by hand（主语策略：转被动）

中文 龙井茶通常手工制作 是典型的无施动者句——没有说「谁」在制作，动作承受者「龙井茶」反而是话题主语。这正是英文被动语态的用武之地，所以 subjectStrategy 选「转被动」：主语 Longjing tea，谓语 is made（被动），方式状语 by hand。后半「其价格可能极其昂贵也可能比较便宜，这取决于...」换主语谈价格，独立成第二个并列分句处理。

【降级】 and 并列分句 + depending on... 现在分词作状语

其价格可能极其昂贵，也可能比较便宜 换主语谈价格，用 and 接一个并列分句：its price can be extremely high or relatively low。最后 这取决于茶的生长地、采摘时间和制作工艺 是对前句的整体说明（「这」指的是价格的高低），用现在分词短语 depending on... 作状语，避免另起 it depends on... 的口语句式。三个并列名词性短语 the place where it grows / when it is picked / how it is made 也可统一写成名词短语 its growing region, harvest time and craftsmanship，但三个 wh- 从句更清晰。

【语法】语态

手工制作 用被动 is made by hand, 强调茶被人手工制作; 不要写成主动 makes by hand。

时态

整句仍回指全篇基调用一般现在时——讲的是龙井茶通常如何制作、价格通常如何, 都是普遍现状。is made / can be / depending 都不带过去时形式。

情态动词

可能极其昂贵, 也可能比较便宜 表「可能性的两端」, 用 can be... or... 表客观可能性, 比 may be 更贴合「客观上存在这种可能」的语义。

并列结构平行

茶的生长地、采摘时间和制作工艺 三项必须保持英文平行结构: 要么都用 wh- 从句 (where it grows, when it is picked, and how it is made), 要么都用名词短语 (its growing region, harvest time and craftsmanship), 不可前两个用从句、第三个突然用名词。

介词搭配

「手工」用 by hand (固定搭配, hand 不加冠词); 「取决于」用 depend on, 不要写 depend of/from。

【译文】 Longjing tea is usually made by hand, and its price can be extremely high or relatively low, depending on where it grows, when it is picked, and how it is made.

4. 龙井茶富含维生素C和其他多种有益健康的元素。

【主干】 Longjing tea—is rich in—vitamin C and other elements (主语策略: 原句主语)

中文主语 龙井茶 明确, 直接译作 Longjing tea; 谓语「富含」对应固定表达 be rich in / be abundant in, 所以骨架是 Longjing tea is rich in...。介词 in 的宾语是两个并列名词短语: vitamin C 和 various other elements beneficial to health。

【降级】 形容词短语 beneficial to health 作后置定语

有益健康的元素 中「有益健康的」修饰「元素」, 按英文习惯不全堆在名词前, 而把较长的形容词短语 beneficial to health 后置: other elements beneficial to health; 或用定语从句 elements that are good for health。冠以 various 表「多种」, 副词位置在 other 之前: various other elements。

【语法】时态

讲客观成分, 仍回指全篇基调用一般现在时, 谓语用 is rich in。

主谓一致

主语 Longjing tea 作单数, 谓语用 is rich, 不要写成 are rich。

单复数与冠词

vitamin C 作不可数物质名词, 零冠词; elements 为可数复数, 由 various other 修饰, 注意 various 已含复数义, elements 必须加 s。

介词搭配

「富含」固定用 be rich in, 介词 in 不可换 with/of; 「有益健康」用 beneficial to health 或 good for health, 介词分别 to / for, 不要混用。

【译文】 Longjing tea is rich in vitamin C and various other elements beneficial to health.

5. 经常喝龙井茶有助于减轻疲劳、延缓衰老。

【主干】 Drinking Longjing tea regularly—helps—relieve and delay (主语策略：形式主语it)

中文 经常喝龙井茶 是动作性短语作主语，英文有两种地道处理：① 动名词短语作主语 Drinking Longjing tea regularly helps...；② 形式主语 it: It helps relieve... to drink Longjing tea regularly. 主体考生推荐用动名词作主语，更简洁直接。所以骨架取：Drinking Longjing tea regularly + helps + 不带 to 的动词原形 (help do)。我们把 subjectStrategy 标为「形式主语 it」主要为提醒考生这里有第二条同样地道的路；本句最终走动名词主语方案。

【降级】 help (to) do 双并列动词

有助于减轻疲劳、延缓衰老 用固定句型 help (to) do sth., 后面跟两个并列动词原形 relieve fatigue and delay aging (或 slow down aging)。两个动词必须保持平行：都是动词原形、都不带 to，或都带 to。

【语法】 时态

讲普遍功效，仍回指全篇基调用一般现在时，谓语用 helps (动名词主语作单数)。

主谓一致

动名词短语 Drinking Longjing tea regularly 作主语时按单数处理，谓语必须用 helps，不要写 help。

搭配 help do

help 后接动词原形或 to do，主体考生写 help relieve / help to relieve 都对，但相邻两次必须保持一致；本句两个并列动词都用原形 (help relieve fatigue and delay aging)。

用词

「疲劳」用不可数名词 fatigue (零冠词)；「衰老」用 aging (美式) 或 ageing (英式)，全篇统一一种拼写。

【译文】 Drinking Longjing tea regularly helps relieve fatigue and delay aging.
