真题阅读 完整原文

2021 年 6 月第 2 套 Section C Passage One | 本次仅做 Q46-47。来自 cet4.zip 整卷 PDF 第 8 页。P1-P7 为本册添加的定位标签；保留原文。

P1 Sugar shocked. That describes the reaction of many Americans this week following revelations that, 50 years ago, the sugar industry paid Harvard scientists for research that shifted the focus away from sugar's role in heart disease—and put the spotlight(注意的中心) squarely on dietary fat.

P2 What might surprise consumers is just how many present-day nutrition studies are still funded by the food industry. Nutrition scholar Marion Nestle of New York University spent a year informally tracking industry-funded studies on food. "Roughly 90% of nearly 170 studies favored the sponsor's interest," Nestle tells us. Other systematic reviews support her conclusions.

P3 For instance, studies funded by Welch Foods—the brand behind Welch's 100% Grape Juice—found that drinking Concord grape juice daily may boost brain function. Another, funded by Quaker Oats, concluded, as a Daily Mail story put it, that "hot oatmeal(燕麦粥) breakfast keeps you full for longer."

P4 Last year, The New York Times revealed how Coca-Cola was funding well-known scientists and organizations promoting a message that, in the battle against weight gain, people should pay more attention to exercise and less to what they eat and drink. Coca-Cola also released data detailing its funding of several medical institutions and associations between 2010 and 2015.

P5 "It's certainly a problem that so much research in nutrition and health is funded by industry," says Bonnie Liebman, director of nutrition at the Center for Science in the Public Interest. "When the food industry pays for research, it often gets what it pays for." And what it pays for is often a pro-industry finding.

P6 Given this environment, consumers should be skeptical(怀疑的) when reading the latest finding in nutrition science and ignore the latest study that pops up on your news feed. "Rely on health experts who've reviewed all the evidence," Liebman says, pointing to the official government Dietary Guidelines, which are based on reviews of hundreds of studies.

P7 "And that expert advice remains pretty simple," says Nestle. "We know what healthy diets are—lots of vegetables, not too much junk food, balanced calories. Everything else is really difficult to do experimentally."

Technology can help people, but its effects depend on how we use it. One reason is that it can save time and offer useful information.

However, using technology should not replace thinking. Students should compare information from different sources and check their work carefully. By doing so, they can find mistakes and make better decisions.

Checking their work can also help them pay attention to details. Technology is a useful tool. We should make good use of it rather than depend too much on it.

科技能够帮助人们，但它的影响取决于我们如何使用它。一个原因是，它可以节省时间并提供有用的信息。

然而，使用科技不应取代思考。学生应该比较不同来源的信息，并认真检查自己的作业。通过这样做，他们可以发现错误并作出更好的决定。

检查作业也能帮助他们注意细节。科技是有用的工具。我们应该充分利用它，而不是过度依赖它。

阅读解析与错因记录

Q46 B; Q47 D。依据：原卷 PDF 第 8 页，解析第 106-108 页。

46: P1 把关注点从糖转向膳食脂肪。shifted the focus away from...与 turn attention away from...to...对应。C 把新焦点错换成糖业；D 增加 large-scale。

47: P2 说近 170 项研究中约 90% 偏向资助方利益。Roughly 90%≈nearly all; favored the sponsor's interest≈serve the purpose of the funders。C 只说资金来源；B 混淆“综述支持结论”和“研究基于综述”。

P2 关键结构：Roughly 90% of nearly 170 studies / favored / the sponsor's interest。studies 是主语核心，favored 是谓语，interest 在此表示利益。
